Saint Augustine on the Resurrection of Christ Gerald O'Collins, 2017 A study of Augustine's account of the resurrection of Christ followed by an examination of the reception of those ideas in the twentieth and twenty first centuries **Civilization and Ethics** Albert Schweitzer, 1929 The Philosophy of Civilization Albert Schweitzer, 1929 **A History of Psychology in Western Civilization** Bruce K. Alexander, Curtis P. Shelton, 2014-07-03 This book is a re introduction to psychology It focuses on great scholarly thinkers beginning with Plato Marcus Aurelius and St Augustine who gave the field its foundational ideas long before better known founders such as Galton Fechner Wundt and Watson appeared on the scene Psychology can only achieve its full breadth and potential when we fully appreciate its scholarly legacy Bruce Alexander and Curtis Shelton also argue that the fundamental contradictions built into psychology's history have never been resolved and that a truly pragmatic approach as defined by William James can produce a layered psychology that will enable psychologists to face the fearsome challenges of the twenty first century A History of Psychology in Western Civilization claims that contemporary psychology has overemphasized the methods of physical science and that psychology will need a broader scientific orientation alongside a scholarly focus in order to fully engage the future *The Official Guide to Sid Meier's Civilization* Keith Ferrell, Edmund Ferrell, 1992 The Story of Us Humans, from Atoms to Today's Civilization Robert Dalling, 2006-03 The Story of Us Humans explains human nature and human history including the origins of our species emotions behavior morals and society It explains what we are how we got here and where we are today by describing the origin history and current ways of our neighborhoods religion government science technology and business Written in plain language it explains what astronomy physics geology biology chemistry anthropology history religion social science and political science tell us about ourselves Most everyone feels that human success is measured in terms of healthy and happy children and communities Human thoughts and actions involve little besides love and children spouse and family community and justice because we are parenting mammals and social primates Each of us simply wants to laugh and joke with our family and friends pursue life raise children and strive to be a valued and contributing member of our community We have made incredible progress building civilization in just a few hundred generations using nothing except our animal minds Have you wondered What are the laws of nature and how many laws are there How did molecular life begin and then evolve into worms fish amphibians reptiles mammals primates and humans What are the differences between these animals How did we get from the Big Bang to bacteria and on to Christianity democracy and globalization What is life like for gatherer hunters When did we first become farmers and first build cities and what was life like at those times What was life like in Ancient Mesopotamia Ancient Athens 13th century Cahokia Medieval China and Europe 19th Century New England Yoruban villages and in the U S during the 1920s What was the Industrial Revolution and how has it changed our lives What are the Hindu Muslim Confucian Jewish Christian Buddhist and Humanist religions and world views How have our wages infant mortality

Mignolo,2021-07-09 In The Politics of Decolonial Investigations Walter D Mignolo provides a sweeping examination of how coloniality has operated around the world in its myriad forms from the sixteenth century to the twenty first Decolonial border thinking allows Mignolo to outline how the combination of the self fashioned narratives of Western civilization and the hegemony of Eurocentric thought served to eradicate all knowledges in non European languages and praxes of living and being Mignolo also traces the geopolitical origins of racialized and gendered classifications modernity globalization and cosmopolitanism placing them all within the framework of coloniality Drawing on the work of theorists and decolonial practitioners from the Global South and the Global East Mignolo shows how coloniality has provoked the emergence of decolonial politics initiated by delinking from all forms of Western knowledge and subjectivities The urgent task Mignolo stresses is the epistemic reconstitution of categories of thought and praxes of living destituted in the very process of building Western civilization and the idea of modernity The overcoming of the long lasting hegemony of the West and its distorted legacies is already underway in all areas of human existence Mignolo underscores the relevance of the politics of decolonial investigations in and outside the academy to liberate ourselves from canonized knowledge ways of knowing and praxes of living **The German-French War of 1870 and Its Consequences Upon Future Civilization** William E.
