**Negotiating Your Career in Structural Engineering** M A Beg, 2020-09-05 The fact that a young engineer does not understand the significance of planning a career until around 10 years post graduation This is true for nearly all of us engineers except maybe a selected few When a youngster steps out of their college as a qualified engineer full of accomplishment and dreams and hopes for the future they are too occupied with the success and are also too happy and relieved to have attained a commendable triumph Apparently thinking about a career immediately after accomplishing this big feat is not the first priority at this young age It is sometimes the sense of freedom and ecstasy which takes them to a new high and clouds their minds for some time It is in the aftermath of this ecstasy that young graduates find that he has little knowledge of how to take the first step in his career This guide aims to remove the deliberation of the unsure and unknown future and the lack of awareness of what to do next and of what needs to be done to kick start a career Not knowing what to do is a dangerous situation in itself I have seen young engineers struggle to decide what to do Your teachers in your colleges are good academicians but unfortunately seldom know about the practicalities and challenges which you will face and should brace for in your career in the industry They are a different class more focused on the research and academic aspect of engineering and have great capabilities and expertise in those areas Unfortunately this kind of expertise may not help you in getting a job in the industry Through this book I have attempted to guide you on how to take some tangible concrete and quantifiable physical actions which can help you start your career and move up in life I have tried to make it as simple as possible and laid down the precise steps which you may need to take from the start till you become a renowned personality in your field This guide is not meant to be an inspirational or spiritual guide for your inner self on the contrary it gives advice on the real world and talks about the measurable actions you can take to promote your career The Book also has a very elaborate chapter on how to prepare your CV and a separate chapter on how you can start your own enterprise
