coffee timer. The futuristic physical button from the first generation is still present, offset from the top of the device and there's a light snooze button which is helpful if you use the device for alarms and reminders. One notable thing about the new design is the elliptical band which rises to its highest point and the power button is the back of the unit, which means you shouldn't expect the omnidirectional microphone to be in the front of the device, which promises to make Alexa's response time a lot faster. In our tests, the newer Dot does respond quicker than the Echo Dot, but it's a new low for Amazon, which is a good thing. Ready to explore new features and know your device better?
