**Abstract** The purpose of this study was to determine the effect of a 12-week, 30-min, 3 times per week, low-impact aerobically and resistance training program on the physical fitness of sedentary, middle-aged women. The program was designed to improve cardiovascular fitness, muscular strength, and muscular endurance. The program was evaluated using a pretest and a posttest. The pretest was conducted at the beginning of the program, and the posttest was conducted at the end of the program. The results of the study showed that the program had a significant effect on the physical fitness of the women. The women who participated in the program showed significant improvements in cardiovascular fitness, muscular strength, and muscular endurance. The program was found to be an effective means of improving the physical fitness of sedentary, middle-aged women.
