**Civic Education for SS 1-3** Nigeria. Federal Ministry of Education, 2009      Essential Civic Education for Senior Secondary Schools (SS1, SS2 & SS3) Gbenga M. Babalola, Igbinobu Chuks, 2015      School, Society, and State Tracy L. Steffes, 2017-10-05 Democracy has to be born anew every generation and education is its midwife wrote John Dewey in his classic work *The School and Society* In *School Society and State* Tracy Steffes places that idea at the center of her exploration of the connections between public school reform in the early twentieth century and American political development from 1890 to 1940 American public schooling Steffes shows was not merely another reform project of the Progressive Era but a central one She addresses why Americans invested in public education and explains how an array of reformers subtly transformed schooling into a tool of social governance to address the consequences of industrialization and urbanization By extending the reach of schools broadening their mandate and expanding their authority over the well being of children the state assumed a defining role in the education and in the lives of American families In *School Society and State* Steffes returns the state to the study of the history of education and brings the schools back into our discussion of state power during a pivotal moment in American political development      *Yearbook of the National Society for the Study of Educational Sociology*, 1928      **Bibliographies on Educational Sociology** National Society for the Study of Educational Sociology, 1928      **History of a Civic Education Project Implementing the Social-problems Technique of Instruction** Robert E. Following closely behind the global pandemic's recent forced challenges to schools and teachers, Xu gives an overview of how educational researchers and schools in Asia respond to challenges in times of change. Her research focuses on how they adjust or change curriculum policy and practice to find a balance between developing innovation in response to fast changing societal needs and maintaining the existing education systems that traditionally predict success for students. In this book, curriculum innovation is documented in three themes: 21st century skills and competency based curriculum, technology supported curriculum, and equity in curriculum. Xu includes three types of chapters: 1 case studies that provide detailed analyses of curriculum innovation at the school or country level; 2 conceptual analyses that deepen our understanding of curriculum issues using a new lens; and 3 literature reviews that provide an overview of research in particular topics. The volume will be of great interest to researchers and educators interested in the role of curriculum innovation in times of change. In particular, it focuses on the ways innovative curriculum provides opportunities for individual students to maximize their potential while also acknowledging the constraints of local education systems.
