Commercial Design Using AutoCAD 2011 Daniel John Stine,2010-08-09 Commercial Design Using AutoCAD 2011 is designed for the architectural student using AutoCAD 2011 The intent is to provide the student with a well rounded knowledge of tools and techniques for use in both school and industry This text takes a project based approach to learning AutoCAD in which the student develops a campus library Each book comes with a CD containing numerous video presentations of the written material The first two chapters are intended to get the reader familiar with the user interface as well as the most common menus tools and commands that are required to work effectively with AutoCAD 2011 By the end of chapter two the student will be excited and prepared to take on a much larger project Throughout the rest of the book the student develops the campus library Using step by step tutorial lessons the library project is followed through to create FFE plans interior elevations schedules and details In these chapters many of the additional tools and features of AutoCAD 2011 are covered in greater detail General building codes and industry standard conventions are covered in a way that is applicable to the current exercise

The AutoCAD Book James M. Kirkpatrick,2005 This is either a lecture or self paced book on drawing that has enough exercises for several semester length courses using the AutoCAD 2005 program Individual commands are explained as they are used to make a recognizable drawing not as isolated descriptions that have little connection to where they are used The exciting improved concepts from AutoCAD 2004 such as gradient hatch and plotting rendered drawings directly from AutoCAD are covered along with commands new to AutoCAD 2005 including TABLE SHEET SETS and PALETTE customizing The new chapter with sketches that can be used for approximately 200 exercises is a welcome source of problems for the busy instructor These problems range from simple to complex
