current There are two types of current direct current DC and alternating current AC DC is current that flows in one direction
with a constant voltage polarity while AC is current that changes direction periodically along with its voltage polarity Thomas
Edison and Alessandro Volta were pioneers in DC and wrote much of electricity s history But as societies grew the use of DC
over long transmission distances became too inefficient Nikola Tesla changed all that with the invention of alternating
current electrical systems With AC it is possible to produce the high voltages needed for long transmissions Therefore today
most portable devices use DC power while power plants produce AC This book may give you Industrial Electrical Basics What
