Nagel,2015-06-02 Numerical simulation and modelling using High Performance Computing has evolved into an established technique in academic and industrial research At the same time the High Performance Computing infrastructure is becoming ever more complex For instance most of the current top systems around the world use thousands of nodes in which classical CPUs are combined with accelerator cards in order to enhance their compute power and energy efficiency This complexity

can only be mastered with adequate development and optimization tools Key topics addressed by these tools include parallelization on heterogeneous systems performance optimization for CPUs and accelerators debugging of increasingly complex scientific applications and optimization of energy usage in the spirit of green IT This book represents the proceedings of the 8th International Parallel Tools Workshop held October 1-2, 2014 in Stuttgart, Germany, which is a forum to discuss the latest advancements in the parallel tools Northeast American Sports Car Races 1950-1959 Terry O'Neil, 2010 This book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s The evolution from amateur drivers racing on public roads in 1950 to both professional and amateur drivers racing at private purpose built tracks in 1959 demanded huge leaps of faith, trust and understanding The transition was neither easy nor uneventful for drivers, clubs or track owners and the tragedy, politics and in *Catalog of Copyright Entries.
