Building Guide House Self Slipforms Stone:

Stone House, 2009 Have you ever dreamed of building or at least living in a beautiful stone house For more than five years Stonefield Publishing's *Stone House A Guide to Self Building with Slipforms* has been the prime source for information on a unique method of stone masonry that affords everyone regardless of their level of building experience the opportunity to create walls and even homes of stone The technique has been around for a long time says author Tom Stanley but it's not that well known Add to that the mystique that surrounds the traditional craft of stonemasonry and there's no wonder that stone houses are not all that common even in areas where stone is abundant The book has now been revised and is being re-released with two new chapters digital enhancement to the original images and new photographs Stonefield Publishing's Marketing Manager Brad Andersen notes We've received a lot of great feedback from readers over the years but one consistent issue was the image quality We took those comments to heart and with technology that wasn't available to us back in 2003 have just brought the photos to life Tom says that writing the new chapters and preparing the revised edition for print allowed him to finally complete his original vision of the book One of the new chapters called Reflections could only have been written after the passage of time It's about looking back and thinking about what could have been done differently what worked very well and also speculating on potential targets for future alteration It really finished the story for me and makes it more complete for readers *Stone House* focuses on the story of Tom Stanley's own experience of building his house with the slipform method This book is certainly not your average how to offering it is more like a tapestry of information and entertainment interwoven with technical advice diagrams and pictures tales of the owner builder experience and as the title implies plenty of guidance on how to build your own stone house using the slipform method of construction It makes great reading for those that are on the way to becoming self builders as well as the rest of us that dream of such adventures

Earth-Sheltered Houses Rob Roy, 2006-04-03 The only how to manual on the subject directed to mainstream owner builders An earth sheltered earth roofed home has the least impact upon the land of all housing styles leaving almost zero footprint on the planet *Earth Sheltered Houses* is a practical guide for those who want to build their own underground home at moderate cost It describes the benefits of sheltering a home with earth including the added comfort and energy efficiency from the moderating influence of the earth on the home's temperature keeping it warm in the winter and cool in the summer low maintenance and the protection against fire sound earthquake and storm afforded by the earth Extra benefits from adding an earth or other living roof option include greater longevity of the roof substrate fine aesthetics and environmental harmony The book covers all of the various construction techniques involved including details on planning excavation footings floor walls framing roofing waterproofing insulation and drainage Specific methods appropriate for the inexperienced owner builder are a particular focus and include pouring one's own footings and or floor the use of dry stacked surface bonded concrete block walls post and beam framing plank and beam roofing and drainage methods and self adhesive

waterproofing membranes The time tested easy to learn construction techniques described in Earth Sheltered Houses will enable readers to embark upon their own building projects with confidence backed up by a comprehensive resources section that lists all the latest products such as waterproofing membranes types of rigid insulation and drainage products that will protect the building against water damage and heat loss
