Building Envelopes An Integrated Approach Jenny Lovel:

Building Envelopes Jenny Lovel, 2013-07-02 Few parts of a building work harder than its envelope also known as its facade The envelope is the part of the building most visible from the outside so it should be visually appealing but it can also have the biggest effect on the well being and safety of its occupants so the envelope should help heat and cool the building allow light into it and provide necessary structure Too often a building's envelope is more aesthetically striking than functional or vice versa A great building envelope though architecturally integrates all of its elements [Integrated Approach for Intelligent Envelope Design](#) Sameh Monna, 2011 [Building Envelopes in a Holistic Perspective](#) Leo Hendriks, Hugo Hens, 2000 **Advanced Building Envelope Components** Francesca Stazi, 2019-06-01 Advanced Building Envelope Components Comparative Experiments focuses on the latest research in innovative materials systems and components also providing a detailed technical explanation on what this breakthrough means for building exteriors and sustainability Topics include a discussion of transparent envelope components including intelligent kinetic skins such as low e coatings high vs low silver content in glass solar control coatings such as silver vs niobium vs tin and more In addition opaque envelope components are also presented including opaque dynamic facades clay lining vs plasterboard and nano clayed foams Includes real case studies that explore in detail the behavior of different envelopes Presents laboratory tests on existing insulation if any through samples extracted on site to quantify actual performances Provides the tools and methods for comparing selecting and testing materials and components for designing effective building envelopes Covers both transparent and opaque envelope components as well as opaque dynamic facades **PCM-Enhanced Building Components** Jan Kořný, 2015-05-07 Presenting an overview of the use of Phase Change Materials PCMs within buildings this book discusses the performance of PCM enhanced building envelopes It reviews the most common PCMs suitable for building applications and discusses PCM encapsulation and packaging methods In addition to this it examines a range of PCM enhanced building products in the process of development as well as examples of whole building scale field demonstrations Further chapters discuss experimental and theoretical analyses including available software to determine dynamic thermal and energy performance characteristics of building enclosure components containing PCMs and present different laboratory and field testing methods Finally a wide range of PCM building products are presented which are commercially available worldwide This book is intended for students and researchers of mechanical architectural and civil engineering and postgraduate students of energy analysis dynamic design of building structures and dynamic testing procedures It also provides a useful resource for professionals involved in architectural and mechanical civil engineering design thermal testing and PCM manufacturing **Building Envelope Technology Roadmap** United States.
