**Constructing Professional Discourse** Concepción Orna-Montesinos, 2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus

linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced *Historic Preservation Technology* Robert A.

Young,2008-03-21 This introduction to historic preservation goes well beyond the Secretary of the Interior s Standards for Rehabilitation and shows how wood stone masonry and metal were used in the past and how adaptive re use can be employed to bring modern amenities to historic structures The book covers all aspects of the exterior and interior building fabric including windows roofing doors porches and electrical and mechanical systems for both residential and small scale commercial buildings Richly illustrated with photographs showing typical elements of historic buildings decay mechanisms and remediation techniques the book also contains a variety of useful case studies and features a companion Website that offers dozens of additional images and resources **Catalogue of the J.
