Algorithms in Advanced Artificial Intelligence R. N. V. Jagan Mohan, B. H. V. S. Rama Krishnam Raju, V. Chandra Sekhar, T. V. K. P. Prasad, 2025-05-23 Algorithms in Advanced Artificial Intelligence is a collection of papers on emerging issues challenges and new methods in Artificial Intelligence Machine Learning Deep Learning Cloud Computing Federated Learning Internet of Things and Blockchain technology It addresses the growing attention to advanced technologies due to their ability to provide paranormal solutions to problems associated with classical Artificial Intelligence frameworks AI is used in various subfields including learning perception and financial decisions It uses four strategies Thinking Humanly Thinking Rationally Acting Humanly and Acting Rationally The authors address various issues in ICT including Artificial Intelligence Machine Learning Deep Learning Data Science Big Data Analytics Vision Internet of Things Security and Privacy aspects in AI and Blockchain and Digital Twin Integrated Applications in AI Proceedings of International Conference on Generative AI, Cryptography and Predictive Analytics Deepali Virmani, Oscar Castillo, Valentina Emilia Balas, Ahmed A. Elngar, 2025-03-08 The book presents the proceedings of the International Conference on Generative AI Cryptography and Predictive Analytics ICGCPA 2024 held at VIPS TC School of Engineering and Technology Pitampura Delhi India during June 28 29 2024 It covers Generative AI s role in problem solving examining applications in image synthesis content creation healthcare and optimization challenges This book is a valuable resource for postgraduate students in various engineering disciplines **Generative AI and Generative AI of Things for Sustainable Smart Cities** Simon Elias Bibri, 2025-12-08 This pioneering book invites readers on a compelling journey into Generative Artificial Intelligence GAI and its groundbreaking convergence with AI of Things AIoT introducing GAIoT as a transformative frontier in urban computing and intelligence GAIoT signals a paradigm shift towards more intelligent self learning self evolving and context aware systems capable of generating adaptive forward looking solutions to the complex infrastructural and environmental challenges confronting sustainable smart cities With its combination of theoretical depth applied innovation and interdisciplinary scope the book offers a comprehensive examination of deep generative models namely Generative Adversarial Networks Variational Autoencoders Diffusion Models Transformers and hybrid architectures and their applications in environmental sustainability climate resilience infrastructure optimization dynamic decision making and data driven urban management and planning From synthetic data generation data augmentation and data imputation to predictive modeling and scenario simulation GAIoT is driving the next wave of climate responsive environmentally conscious smart city innovation What sets this book apart is its first of its kind focus on GAIoT as a pathbreaking force in shaping the future of sustainable urban development It delivers actionable insights conceptual and operational frameworks case studies and policy guidance equipping diverse stakeholders with the tools to build cities that not only respond to change but also anticipate and shape it Targeting a broad and cross disciplinary audience the book shares state of the art research presents innovative

solutions and forecasts future trends in urban transformation As both a seminal reference and a practical resource for researchers technologists practitioners professionals and policymakers it provides essential guidance for those engaged in advancing the next frontier in urban computing and intelligence Advanced Computational Intelligence Techniques for Engineers T. Joshva Devadas,Naveenkumar Jayakumar,N. Narayanan Prasanth,P. Anandhakumar,Shrikant Jadhav,2025-12-29 This book presents a thorough examination of computational intelligence and its significant influence on solving intricate engineering challenges It covers fundamental theories as well as advanced applications illustrating how techniques in computational intelligence are transforming engineering practices The book is organized into distinct sections each concentrating on specific engineering domains in which computational intelligence assumes a critical role The book presents a methodical coverage of computational intelligence principles and techniques illustrated by examples from various engineering domains emphasizes a problem solving approach demonstrating how computational intelligence can be used to tackle complex problems offers use cases and real world examples to facilitate targeted learning and understanding and includes discussion on ethical considerations advocating for the responsible use of technology and consideration of societal impacts This reference book is for engineers researchers and scholars interested in computational intelligence techniques in engineering Mastering Deepfake Technology: Strategies for Ethical Management and Security Sanjay Taneja,Swati Gupta,Mohit Kukreti,Abhishek Singh Chauhan,2025-08-08 This book offers a comprehensive exploration of the profound challenges and opportunities presented by deepfake technology across industries society and governance It delves into the multifaceted impacts of synthetic media examining its potential to reshape corporate trust economic stability and public discourse while emphasizing strategies to build resilience and ethical frameworks Key themes include the role of intellectual capital in safeguarding corporate reputation the risks of deepfake fraud in financial markets and the implications for insurance banking and fintech sectors Through cross disciplinary analyses the book unravels the disruptive influence of deepfakes on political affairs economic policies and corporate transparency Highlighting real world case studies it addresses workplace resilience data driven decision making and the intersection of deepfake technology with marketing innovation and job satisfaction From social media marketing to public trust and privacy concerns the book offers actionable insights for navigating the ethical dilemmas posed by synthetic media With a focus on collaboration across disciplines the book equips readers with strategies for mitigating risks promoting media literacy and leveraging AI responsibly Mastering Deepfake Technology is an essential guide for academics professionals and policymakers seeking to understand and address the complexities of this emerging frontier *Generative Artificial Intelligence in Healthcare* Rajendra Kumar,Shankar Ramamoorthy,Vishal Jain,Utku Köse,Ong Eng Tek,2025-07-29 Generative artificial intelligence AI is a transformative force in smart healthcare It can produce contents virtually indistinguishable from human created material with the power to redefine healthcare and revolutionize how medical science interacts with technology This book presents the potential applications and

benefits of generative AI in healthcare and discusses its execution challenges and ethical aspects

Generative Artificial Intelligence in Healthcare Current Practices and Future Development

starts by reviewing the past and then discussing the present of generative AI based systems and the potential challenges the future might bring It then highlights the integration of generative AI with IoT and blockchain technologies along with offering case studies The book explores how to integrate augmented and virtual reality into generative AI based healthcare and covers the development of an effective machine algorithm for generative AI based healthcare as well as the design and implementation of generative adversarial networks GANs in healthcare systems Discussions about data security and ergonomic design for healthcare products are also included in the book This book will provide a platform for the past present and future of generative AI and will help researchers and healthcare practitioners generate more robust solutions
