Earthly Bodies, Magical Selves Sarah M. Pike, 2001-01-24 Recent decades have seen a revival of paganism and every summer people gather across the United States to celebrate this increasingly popular religion Sarah Pike's engrossing ethnography is the outcome of five years attending neo pagan festivals interviewing participants and sometimes taking part in their ceremonies *Earthly Bodies Magical Selves* incorporates her personal experience and insightful scholarly work concerning ritual sacred space self identity and narrative The result is a compelling portrait of this frequently misunderstood religious movement Neo paganism began emerging as a new religious movement in the late 1960s In addition to bringing together followers for self exploration and participation in group rituals festivals might offer workshops on subjects such as astrology tarot mythology herbal lore and African drumming But while they provide a sense of community for followers Neo Pagan festivals often provoke criticism from a variety of sources among them conservative Christians Native Americans New Age spokespersons and media representatives covering stories of

Zeller, 2023-05-23 Clothing dress and ornamentation are crucial parts of individual and communal religious life and practice yet they are too often overlooked This book convenes leading scholars to explore the roles of attire and adornment in the creation and communication of religious meaning identity and community Contributors investigate aspects of religious dress in North America in the nineteenth twentieth and twenty first centuries considering adornment practices in a wide range of religious traditions and among individuals who straddle religious boundaries The collection is organized around four frameworks for understanding the material culture of religion theological interpretation identity formation negotiation of tradition and activism *Religion Attire and Adornment in North America* features essays on topics such as Black Israelites use of African fabrics Christian religious tattoos Wiccan ritual nudity Amish plain dress Mormon sacred garments Hare Krishna robes and the Church of Body Modification Spanning the diversity of religious practice and expression this book is suitable for a range of undergraduate courses and offers new insights for scholars in many disciplines *Seeing Nature Through Gender* Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male

subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet
