Influences of the IEA Civic and Citizenship Education Studies Barbara Malak-Minkiewicz, Judith Torney-Purta, 2021-05-26 This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse research policymaking and practice The IEA International Civic and Citizenship Education Study ICCS first conducted in 2009 was followed by a second cycle in 2016 The project was linked to the earlier IEA Civic Education Study CIVED 1999 2000 IEA's ICCS remains the only large scale international study dedicated to formal and informal civic and citizenship education in school It continues to make substantial contributions to understanding the nature of the acquired civic knowledge attitudes and participatory skills It also discusses in depth how a wide range of countries prepare their young people for citizenship in changing political social and economic circumstances The next cycle of ICCS is planned for 2022 In this book more than 20 national representatives and international scholars from Europe Latin America Asia and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999 2000 have been used to improve nations understanding of their students civic knowledge beliefs attitudes current civic related behaviors and intentions for future participation in a comparative context There are also chapters summarizing the secondary analysis of those studies results indicating their usefulness for educational improvement and reflecting on policy issues The analyses and reflections in this book provide timely insight into international educational discourse policy practice and research in an area of education that is becoming increasingly important for many societies *Policies and Practices for Sustainability Transformation in Higher Education Institutions* Vasiliki Kioupi, Rosario Michel-Villarreal, Felister Nzuve, Naoya Abe, George Giannopoulos, 2025-08-07 Calls for transforming higher education toward sustainability by academics are not new Recently students both current and prospective have actively voiced their demands for this change They seek an education that equips them to navigate the complexities of sustainability and climate change fostering knowledge and skills for action In response higher education institutions HEIs are formulating strategies to align their mission with sustainability goals However the effectiveness of these strategies along with the underlying policies and practices remains insufficiently studied To address this gap it is crucial to convene academics professional staff and students for discussions on necessary cultural shifts a roadmap and ways to monitor and evaluate this change Such dialogues will lead to improved decision making for transformation to achieve sustainability Students will not only learn about sustainability in their courses but also apply them to their lives within and beyond universities that champion holistic sustainability transformation **Healthcare Management Strategy, Communication, and Development Challenges and Solutions in Developing Countries** Emmanuel K. Ngwainmbi, 2014-05-08 Healthcare Management Strategy Communication and Development Challenges and Solutions in Developing Countries analyzes the ways in which health services public health administration and healthcare policies are managed in developing countries and how

intercultural intergroup and mass communication practices are weakening those efforts. If developing countries are to reach their development goals, their leaders must have a firm understanding of the impact of infectious diseases on their people and take prompt action to fix socioeconomic issues arising from the problems associated with poor health practices. Drawing on experiences from international health organizations such as the United Nations Population Fund (UNFPA), commissioned in poor countries to assist national governments in improving the wellbeing of their citizens, this volume analyzes maternal and child mortality and the spread of infectious diseases and offers communication strategies for the management of malaria, HIV, Aids, Polio, tuberculosis, and others in Somalia, Madagascar, Ghana, South Africa, Zimbabwe, Nigeria, the Democratic Republic of Congo, and India.

Civic Education Richard G. Niemi, Jane Junn, 2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America's high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students' civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching
