Dr Montessori S Own Handbook:

Dr. Montessori's Own Handbook Maria Montessori, 1914 A Montessori Handbook Maria Montessori, 1966 Half the text of this book consists of Dr Montessori's Own Handbook the only authentic practical manual of the Montessori Method and the other half consists of new material on current Montessori theory and practice This volume the first to integrate Dr Montessori's writings with up to date commentary is a preeminently practical book containing her whole theory and its application in a nutshell The book is designed to be useful for both practicing teachers and interested parents Each section of the Montessori text is introduced by an interpretative commentary and accompanied by a brief essay relating that particular aspect of Montessori to current educational practices An Appendix provides a guide to what to look for in a good Montessori school

Dr. Montessori's Own Handbook Maria Montessori, 2016-09-16 Dr Montessori has performed a real service in preparing this guide to her method The handbook will now proceed to take its place as the real exposition of the Montessori system Boston Transcript A full and clear account of the famous method of child education Saturday Review Contains much the same material as did The Montessori Method but in a clear form Atheneum The number of books on Dr Montessori's new educational theories continues to increase We now have Dr Montessori's Own Handbook of the system specially written by the expert herself as a guide to teachers and parents The American Review of Reviews Many enthusiastic prophets have arisen to expound Dr Montessori's ideas to an interested public but this manual for classroom or home bears the thumb print of authority Dr Montessori herself briefly outlines the system exhaustively set forth in her Montessori Method describes her apparatus and explains very clearly its use She also tells again the surprising results the spontaneous discipline and obedience obtained among children from three to six in the Children's House where the organization of their work is complete and where all cause of rebellion being eliminated their freedom is almost absolute Dr Montessori's means include an environment suited to a child's physical needs and didactic material fitted to his intellectual wants through which he may train his senses by the exercise of observation comparison and judgment quicken his psychic qualities and become master of mind and body She would have the child's eye discover that control of the error in placing his cylinders or geometrical insets lies in the material itself The author insists that any one who would guide the child in use of the sensory exercise should first experiment with the material herself and realize the difficulties the child will encounter The book would help the mother who was heard to say I became so interested in reading The Montessori Method I sent for the whole outfit It's come but I haven't dared even show it to Jane Home Progress Supplements by a clearer and more simple description of author's famous method of child education New York State Library Ninety Seventh Annual Report An authentic manual of the Montessori system written by Dr Montessori herself as a guide to teachers and parents It is a concisely written volume of little more than a hundred pages which contains a clear account of the method and includes a description of the Montessori apparatus with instructions for its use Booklist

Finally available a high quality book of the original classic edition of Dr Montessoris Own Handbook This is a new and freshly published edition of this culturally important work by Maria Montessori which is now at last again available to you Enjoy this

classic work today These selected paragraphs distill the contents and give you a quick look inside Dr Montessoris Own Handbook This is the aim which underlies my method of infant education and it is for this reason that certain principles which it enunciates together with that part which deals with the technique of their practical application are not of a general character but have special reference to the particular case of the child from three to seven years of age i e to the needs of a formative period of life A room of this kind is larger than the customary class rooms not only because the little tables and separate chairs take up more space but also because a large part of the floor must be free for the children to spread their rugs and work upon them In the box of material the first three objects which are likely to attract the attention of a little child from two and a half to three years old are three solid pieces of wood in each of which is inserted a row of ten small cylinders or sometimes discs all furnished with a button for a 30 handle He exercises his hands in the delicate act of taking hold of the button with the tips of one or two fingers and in the little movements of the hand and arm as he mixes the cylinders without letting them fall and without making too much noise and puts them back again each in its own place When initiating the child into the education of the sense of touch the teacher must always take an active part the first time not only must she show the child how it is done her interference is a little more definite still for she takes hold of his hand and guides it to touch the surfaces with the finger tips in the lightest possible way Dr. Montessori's Own Handbook (Annotated) Maria
