The New Goliaths James Bessen, 2022-01-01 An approach to reinvigorating economic competition that doesn't break up corporate giants but compels them to share their technology data and knowledge Bessen is a master of unpacking the nuances of a complex array of interrelated trends to build a coherent story of how the promise of the democratized Internet ended up under the control of just a few Read The New Goliaths to see how the forest came to have only room for a few tall trees with the rest of us in the undergrowth Joshua Gans coauthor of Prediction Machines The Simple Economics of Artificial Intelligence Historically competition has powered progress under capitalism Companies with productive new products rise to the top but sooner or later competitors come along with better innovations and disrupt the threat of monopoly Dominant firms like Walmart Amazon and Google argue that this process of creative destruction prevents them from becoming too powerful or entrenched But the threat of competition has sharply decreased over the past twenty years and today's corporate giants have come to power by using proprietary information technologies to create a tilted playing field This development has increased economic inequality and social division slowed innovation and allowed dominant firms to evade government regulation In the face of increasing calls to break up the largest companies James Bessen argues that a better way to restore competitive balance and dynamism is to encourage or compel these companies to share technology data and knowledge

Advances in Speech Recognition Amy Neustein, 2010-09-21 Two Top Industry Leaders Speak Out Judith Markowitz When Amy asked me to co-author the foreword to her new book on advances in speech recognition I was honored Amy's work has always been infused with creative intensity so I knew the book would be as interesting for established speech professionals as for readers new to the speech processing industry The fact that I would be writing the foreword with Bill Scholz made the job even more enjoyable Bill and I have known each other since he was at UNISYS directing projects that had a profound impact on speech recognition tools and applications Bill Scholz The opportunity to prepare this foreword with Judith provides me with a rare opportunity to collaborate with a seasoned speech professional to identify numerous significant contributions to the field offered by the contributors whom Amy has recruited Judith and I have had our eyes opened by the ideas and analyses offered by this collection of authors Speech recognition no longer needs to be relegated to the category of an experimental future technology it is here today with sufficient capability to address the most challenging of tasks And the point click type approach to GUI control is no longer sufficient especially in the context of limitations of modern handheld devices Instead VUI and GUI are being integrated into unified multimodal solutions that are maturing into the fundamental paradigm for computer human interaction in the future
