Intersections of AI and the Freedom of Religion or Belief Chakraborty, Swati, 2025-11-21 With the growing spread of AI in many fields the intersection of religion and AI questions ethics human rights and cultural domains As systems increasingly influence information access and decision making their deployment can either support or threaten religious freedom Exploring this intersection involves examining how algorithmic biases data governance and digital policies impact

religious expression and belief systems Understanding these dynamics is essential for ensuring that AI technologies are developed and applied in ways that uphold fundamental rights and respect diverse worldviews Intersections of AI and the Freedom of Religion or Belief explores how AI has become a powerful force in shaping societies and how it raises significant ethical legal and human rights concerns particularly around the right to freedom of religion or belief This book sheds light on both the risks and the opportunities Covering topics such as AI religion and deep learning applications this book is an excellent resource for scholars technologists policymakers and faith based organizations *Cybernetics and the Constructed Environment* Zihao Zhang,2024-07-24 Grounded in contemporary landscape architecture theory and practice *Cybernetics and the Constructed Environment* blends examples from art design and engineering with concepts from cybernetics and posthumanism offering a transdisciplinary examination of the ramifications of cybernetics on the constructed environment Cybernetics or the study of communication and control in animals and machines has grown increasingly relevant nearly 80 years after its inception Cyber physical systems sensing networks and spatial computing algorithms and intelligent machines create endless feedback loops with human and non human actors co producing a cybernetic environment Yet when an ecosystem is meticulously managed by intelligent machines can we still call it wild nature Posthumanism ideas such as new materialism actor network theory and object oriented ontology have become increasingly popular among design disciplines including landscape architecture and may have provided transformative frameworks to understand this entangled reality However design still entails a sense of intentionality and an urge to control How do we then address the tension between the designer s intentionality and the co produced reality of more than human agents in the cybernetic environment Is posthumanism enough to develop a framework to think beyond our all too human ways of thinking For researchers scholars practitioners and students in environmental design and engineering disciplines this book maps out a paradigm of environmentalism and ecological design rooted in non communication and uncontrollability and puts a speculative turn on cybernetics Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

AI Snake Oil Arvind Narayanan,Sayash Kapoor,2024-09-24 From two of TIME s 100 Most Influential People in AI what you need to know about AI and how to defend yourself against bogus AI claims and products Confused about AI and worried about what it means for your future and the future of the world You re not alone AI is everywhere and few things are surrounded by so much hype misinformation and misunderstanding In *AI Snake Oil* computer scientists Arvind Narayanan and Sayash Kapoor cut through the confusion to give you an essential understanding of how AI works and why it often doesn t where it might be useful or harmful and when you should suspect that companies are using AI hype to sell AI snake oil products that don t work and probably never will While acknowledging the potential of some AI such as ChatGPT *AI Snake Oil* uncovers rampant misleading claims about the capabilities of AI and describes the serious harms AI is already causing in

how it's being built, marketed and used in areas such as education, medicine, hiring, banking, insurance and criminal justice. The book explains the crucial differences between types of AI, why organizations are falling for AI snake oil, why AI can't fix social media, why AI isn't an existential risk and why we should be far more worried about what people will do with AI than about anything AI will do on its own. The book also warns of the dangers of a world where AI continues to be controlled by largely unaccountable big tech companies. By revealing AI's limits and real risks, AI Snake Oil will help you make better decisions about whether and how to use AI at work and home. Science and Technology, 1988. **Making Art With Generative AI Tools** Hai-Jew, Shalin, 2024-04-01. In the dynamic realm of generative artificial intelligence (AI), the fusion of human creativity and machine intelligence has created a vibrant ecosystem of collaborative artmaking. However, this transformative process brings forth a myriad of concerns ranging from ethical considerations and the need for originality to navigating the legal complexities surrounding intellectual property. As more and more online communities appear around the use of AI to aid in the creation of images, there arises a pressing need for a comprehensive guide that not only dissects the intricacies of artmaking with generative AI tools but also offers practical solutions to the evolving dilemmas faced by artists, researchers and technologists. **Making Art With Generative AI Tools** emerges as an exploration of the challenges posed by this intersection of human expression and artificial intelligence. Artists engaging with generative AI find themselves grappling with issues of authenticity, social toxicity and the commercial viability of their creations. From avoiding stereotypical visuals to ensuring proper crediting, the realm of generative AI is rife with these complexities. Furthermore, the blurred lines between human and machine authorship necessitate a deeper exploration of how these innovative tools impact creativity, representation and the very fabric of the art world. **Creating Images**
