**Classroom Strategies for Interactive Learning** Doug Buehl, 2017 Educators across content areas have turned to Classroom Strategies for Interactive Learning for almost two decades. This fully updated fourth edition delivers rich practical research-based strategies that readers have found invaluable in the context of today's classrooms. Doug has written all new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following: Understand the research base for comprehension strategies in content classrooms; Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge; Show learners how to question a text; Teach reading and thinking through a disciplinary lens. At the heart of this edition are more than forty classroom strategies with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking, listening, and language standards.

**Supporting Reading in Grades 6-12** Sybil M. Farwell, Nancy L. Teger, 2012-06-11 This book presents a curricular framework for students grades 6-12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives beyond the required schoolwork. Supporting Reading Grades 6-12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities support classroom teachers' instruction and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st Century Learner.
