Giudici,2021-02-25 Tourism is a fast growing and changing industry which has become a driver of economic development in both developed and underdeveloped countries While the tourism industry s potential for shared value creation and sustainable development is acknowledged the concerns around the environmental and social pressures remain a challenge for businesses organizations and destinations This is because sustainable tourism arguably conflicts with the predominant neoliberal structure of the economy and with the hierarchical profit and consumption driven societies The emphasis on competition growth and profitability may undermine economic viability itself by consuming unreproducible resources and by undermining the six essential elements dignity people prosperity social justice planet and partnership that are conceptually linked to sustainable development The crises recurrently challenging the global travel and tourism environment including climate change bushfires extreme weather disasters pandemics and the financial crisis show the weaknesses of neoliberal approaches and the collective economic dependency of countries on tourism that is vulnerable if not completely

unsustainable This vulnerability asks for understanding that the collective future depends on developing entirely new approaches and interpretation of tourism to effectively respond to the human societal social and climate challenges This book offers a novel and original perspective entailing the application of a humanistic management approach to sustainable tourism which is centered on the value of human life the protection of human dignity and the promotion of well being Multiple theoretical approaches methods and practical cases on an international scale shed light on shared value creation and human dignity as a necessary condition for its achievement in different contexts Implicitly and explicitly they respond to the current urgency to implement strategies to recover from the worldwide impact of the pandemic crisis and to provide a vision of what tourism could and should be when it recovers It will be of interest to researchers academics professionals and postgraduates in the fields of management sustainability and tourism development

Poe, Queerness, and the End of Time Paul Christian Jones, 2022-05-16 This book builds upon recent theoretical approaches that define queerness as more of a temporal orientation than a sexual one to explore how Edgar Allan Poe's literary works were frequently invested in imagining lives that contemporary readers can understand as queer as they stray outside of or aggressively reject normative life paths including heterosexual romance marriage and reproduction and emphasize individuals' present desires over future plans The book's analysis of many of Poe's best known works including *The Raven* *The Fall of the House of Usher* *The Black Cat* *The Masque of the Red Death* and *The Murders in the Rue Morgue* show that his attraction to the liberation of queerness is accompanied by demonstrations of extreme anxiety about the potentially terrifying consequences of non-normative choices While Poe never resolved the conflicts in his thinking this book argues that this compelling imaginative tension between queerness and temporal normativity is crucial to understanding his canon

Celebrate the diverse work of people of color in the craft community and explore the personal political and creative potential of textile arts and crafts In early 2019 the craft community experienced a reckoning when crafters of color began sharing personal stories about exclusion and racial injustice in their field pointing out the inequity and lack of visible diversity within the crafting world Author Jen Hewett who is one of a few prominent women of color in the fiber crafts community now brings together this book as a direct response to the need to highlight the diverse voices of artists working in fiber arts and crafts Weaving together interviews first person essays and artist profiles *This Long Thread* explores the work and contributions of people of color across the fiber arts and crafts community representing a wide spectrum of race age region cultural identity education and economic class These conversations explore techniques and materials belonging identity pride of place cultural misappropriation privilege the value or undervaluing of craft community support structures recognition or exclusion intergenerational dialogue and much more Be inspired by the work and stories of innovative people of color who are making exceptional contributions to the world of craft The diverse range of textile artists and craftspeople featured include knitters

quilters sewers weavers and more who are making inspiring and innovative work yet who are often overlooked by mainstream media Our Common Threads Judy Wright,Helen Young,2022-04-03 In Our Common Threads 38 women tell their stories of textile art received or given and bring to the fore what is often intimate and quietly held special stories In so doing they honour the women involved and tell personal and often generational stories of connection and meaning In an historical way women s fabric art is seldom granted the status it deserves as a genre Our Common Threads challenges that omission and validates art that women have created over eons art given to others as a communication of love and connection
