Community Guidelines State Aid Environmental Protection:

Law in the EU's Circular Energy System Lucila de Almeida, Josephine van Zeven, 2023-12-11 Adopting a holistic and multidisciplinary approach this expertly crafted book comprehensively maps out the complex multi jurisdictional legal landscape pertaining to the EU's circular energy system Offering in depth critical analysis it identifies several areas of law and policy that require further scholarly inquiry to ensure the creation of an effective policy framework which can facilitate the move from a linear to a circular energy system

State Aid and the Energy Sector Leigh Hancher, Adrien de Hauteclocque, Francesco Maria Salerno, 2018-02-22 This important new work offers a comprehensive and compelling account of State aid law and policy and its application to the energy sector Clearly structured and offering meticulous detail and robust analysis it is required reading for all practitioners in the field The volume explores general questions from the definition of State aid to its application in Member States by national courts It also examines questions of procedure questions of compatibility and State aid and the EEA It is an invaluable tool for lawyers policymakers and tax professionals specialising in State aid law and energy law written by a team of leading practitioners and academics in the field

Investing in EU Energy Security Henrik Bjørnebye, 2010-08-27 The author of this timely and sharply focused book shows that in the light of our current knowledge ensuring new investments and the right investments in electricity generation constitutes an urgent energy policy challenge facing the EU over the coming decades He accordingly makes the case for a serious reconsideration of the market facilitation and market intervention rules under electricity market legislation in the EU In the first detailed legal analysis of the EU's internal electricity market framework for investments in electricity generation facilities from the perspective of security of supply this book covers such legal issues as the following in precise detail applicability of the Treaty on the Functioning of the European Union TFEU security of supply as a ground for exemption on the basis of public security justifications of public intervention the applicability of EU State aid provisions to investments in energy security requirements imposed by EU law on Member States for ensuring cost efficient investments in European supply security facilitation of renewable energy sources and cogeneration in the environmental interest the Court of Justice's approach to Member State interventions the Court's decisions on restrictions on free movement in the environmental interest Member States right to launch tendering procedures for new generation capacity Member States right to impose public service obligations in the general economic interest on certain undertakings and relationship between the provisions of the TFEU and those of the Euratom Treaty in relation to investments in nuclear power generation Throughout the study in addition to his analysis of the decisions of the Court of Justice and the Court of First Instance the author takes into account legal literature and Union reports preparatory works and working papers The book demonstrates convincingly that today's energy supply challenges must be based on a broader balancing of security competitiveness and sustainability interests It suggests that the internal electricity market provisions of the Electricity Directive and the Security

of Electricity Supply Directive would benefit from focusing more intensely on requiring investments in technologies and primary energy sources that will help mitigate climate change and reduce European energy import dependency and less on the need for ensuring cost efficient investments through market based means

EU Renewable Electricity Law and Policy Tim Maxian Rusche, 2015-12-11 This book examines the current state of economic regulation of renewable electricity and explores the possibilities for future harmonized EU regulation

European Competition Law Annual 2012 Philip Lowe, Mel Marquis, 2014-10-31 This volume contains papers presented at the 17th Annual EU Competition Law and Policy Workshop organized by Philip Lowe and Mel Marquis and held at the European University Institute on 13-14 July 2012 From a variety of angles the book explores the themes of competition regulation and certain public policies their interactions and in some cases their mutual tensions The authors of the various chapters consider legal and economic issues relating to network industries industrial environmental and trade policies and intellectual property and innovation policies among others Comparative views and the views of judges from different jurisdictions are provided and techniques for mediating among different policy objectives and frameworks are discussed Authors contributing to this book include Rafael Allendesalazar Robert D Anderson Marco Boccaccio Ginevra Bruzzone Cristina Caffarra Alexandre de Streel Ian Forrester Douglas Ginsburg Geert Goeteyn Calvin Goldman Daniel Haar Klike J rim e Suzanne Kingston Lars Kj lbye Paul Lugard Mel Marquis Veljko Milutinovic Giorgio Monti Anna Caroline M ller Rosa Perna Anthony Pygram Philip Lowe Pierre R gibeau and Jon Stern
