TOM AND ANGELA'S THE AUTHORS STORY

Like all good IT stories, theirs started on a project many years ago. Tom was the super techie, Angela the super SME. They fought their way through the 3-year development of a new policy maintenance system for an insurance company. They vehemently disagreed on many aspects, but in the process discovered a fundamental truth about IT projects: The business community (Angela) should decide on the business needs, while the technical team's (Tom's) job was to make the technology deliver what the business needed. Talk about a revolutionary idea! All that was left was learning how to communicate with each other without bloodshed to make the project a resounding success. Mission accomplished! They decided this epiphany was so important that the world needed to know about it. As a result, they made it their mission and their passion to share this ground-breaking concept with the rest of the world. To achieve that lofty goal, they married and began the mission that still
