# COUNTING ATOMS

## WORKSHEET

- Chemical formulas can have three components.
  - The \_\_\_\_\_ which are represented by a single uppercase letter, or represented by an uppercase letter followed by a lowercase letter. This tells you the types of elements in the compound.
  - The \_\_\_\_\_ which are numbers that are found on the lower \_\_\_\_\_ - hand side of each element symbol. This tells you the number of \_\_\_\_\_ of this element in the molecule. If an element symbol has no subscript next to it, then this indicates that there is only \_\_\_\_\_ atom of this element in the molecule.
  - The \_\_\_\_\_ which surround some groups of atoms indicate that the numbers of all of the atoms inside the bracket need to be \_\_\_\_\_ by the \_\_\_\_\_ on the outside of the bracket found on the lower \_\_\_\_\_ - hand side of that bracket.
- Record the number of each atom in each molecule, then record the total number of atoms in the molecule:
