Darwin's Finches: Evolution and Natural Selection

Authors: Kimberly Ornell, Laurel Rodgers, Karen Andersen
Biology Department, Shenandoah University
Copyright © 2016, Kimberly Ornell, Laurel Rodgers, Karen Andersen

LEARNING GOALS

Students will have hands on activity that demonstrates how changes in environmental conditions can result in the evolution of a species.

- Darwin's observations on the Galapagos Finches, which provides a framework for understanding natural selection and evolution.
- Subsequent (and still ongoing) research by Peter and Rosemary Grant which describes the rapid evolutionary changes they observed in the ground finches of Daphne Major Island.
- Students will become finches, with each student representing one beak size and shape.
 - Make hypotheses about how the different beak types and the seed types available will affect his/her ability to forage for food.
 - Test the hypotheses by using their beaks to collect seeds.
 - Organize their own data into tables and graphs and evaluate their hypotheses.
 - Develop their own conclusions, based on the data, about how changes in selection pressure (environmental conditions) can result in differences in survival, and subsequently, in the adaptation and evolution of traits in a population.

PACK OF LIES Sharon Zoller, 2024-04-24 Has your faith in God been damaged by what you've been taught in science? In *Pack of Lies* author Sharon Zoller presents information to breathe new life into your faith demonstrating that school textbooks don't reflect the current scientific information. She discusses the spiritual and cultural consequences of being taught the world is a product of atheistic evolution and she reveals eleven topics from public school science texts that try to support that atheistic evolutionary view. These topics include peer-reviewed articles, rock, sedimentary rock, coal, whales, dinosaurs, similar DNA, developmental similarities, structural similarities, evolution, and natural selection and fossils and transitional forms. Each quote from the textbook is followed by a section rich in gold nugget quotes from today's top scientists like Stephen Meyer, Michael Behe, and James Tour. Science and Conservation in the Galapagos Islands Stephen J. Walsh, Carlos F. Mena, 2012-12-05 In this launch of the Galapagos series, this book provides a broad framing assessment of the current status of social and ecological systems in the Galapagos Islands and the feedback that explicitly links people to the environment. It also highlights the challenges to conservation imposed by tourism in the Galapagos Islands and the attendant migration of people from mainland Ecuador to service the burgeoning tourism industry. Further, there is an emphasis on the status of the terrestrial and marine environments that form the very foundation of the deep attraction to the Islands by tourists, residents, scholars, and conservationists. *AQA GCSE (9-1) Biology Student Book* Nick Dixon, Ali Hodgson, 2016-08-01 Exam Board AQA Level GCSE Subject Biology First Teaching September 2016 First Exam June 2018 AQA approved. Develop your students' scientific thinking and practical skills within a more rigorous curriculum. Differentiated practice questions, progress tracking, mathematical support, and assessment preparation will consolidate understanding and develop key skills to ensure progression. Builds scientific thinking, analysis, and evaluation skills with dedicated Working Scientifically tasks and support for the 8 required practicals, along with extra activities for broader learning. Supports students of all abilities with plenty of scaffolded and differentiated Test Yourself Questions. Show You Can challenges. Chapter review Questions and synoptic practice Questions. Supports Foundation and Higher tier students with Higher tier only content clearly marked. Builds Literacy skills for the new specification with key words highlighted and practice extended answer writing and spelling vocabulary tests. *FREE GCSE SCIENCE TEACHER GUIDES* These will be provided for free via our website. To request your free copies, please email science@hodder.co.uk. *The New Key to Ecuador and the Galápagos* David Pearson, David Middleton, 1999 This guide leads adventurers through South America's premier ecotourist destination, providing detailed naturalist information and descriptive travel tips. The third edition's Galapagos section is expanded with a survey of the island's recent conservation issues. The authors have also added Mindo Garden, a newly reopened cloud forest, and Yachana Lodge, an ecotourism facility that benefits the Quichua Indians. 2008 **Evolution** Jonathan Bard,2021-12-30. Evolution is the single unifying principle of biology and core to everything in the life sciences. More than a century of work by scientists from across the biological spectrum has produced a detailed history of life across the phyla and explained the mechanisms by which new species form. This textbook covers both this history and the mechanisms of speciation; it also aims to provide students with the background needed to read the research literature on evolution. Students will therefore learn about cladistics, molecular phylogenies, the molecular/genetical basis of

evolutionary change including the important role of protein networks symbionts and holobionts together with the core principles of developmental biology The book also includes introductory appendices that provide background knowledge on for example the diversity of life today fossils the geology of Earth and the history of evolutionary thought Key Features Summarizes the origins of life and the evolution of the eukaryotic cell and of Urbilateria the last common ancestor of invertebrates and vertebrates Reviews the history of life across the phyla based on the fossil record and computational phylogenetics Explains evo devo and the generation of anatomical novelties Illustrates the roles of small populations genetic drift mutation and selection in speciation Documents human evolution using the fossil record and evidence of dispersal across the world leading to the emergence of modern humans
