

# Engine

## The 2.7-litre V6 biturbo

This engine will also be used in the Audi S4 and Audi A6.

The engine used in the A6 has a comfort-oriented setup, which means that it has different torque and power output. This effect was principally achieved by modifying the software configuration of the engine control unit.

A tuning protective device prevents the S4 engine control unit being installed in the A6!

**This prevents misuse, which can result in damage to the drivetrain!**

An auxiliary heater is not available as an option for the S4 and the A6, due to the constraints on space.
