

A photograph of an AVR microcontroller circuit on a breadboard. The central component is a large, black, square integrated circuit (IC) with numerous pins extending from its sides. It is surrounded by various electronic components: a tall, silver cylindrical component (likely a variable capacitor or inductor) on the left; a small blue potentiometer or trimmer near the top center; a small green component (possibly a diode or capacitor) near the top right; and a long, black, multi-pin connector at the bottom. The breadboard is orange and sits on a light-colored wooden surface. A semi-transparent black rectangular box is overlaid in the center, containing white text.
