### **Health Promotion in Schools, Universities, Workplaces, and Communities** Graça S. Carvalho, Emily

Darlington, Teresa Vilaça, 2024-12-17 Health education well being improvement and advocacy are effective health promotion strategies among cutting edge Public Health practices Salutogenic perspectives rooted in ecological models have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health It is imperative to shift from targeting protective or risk factors which have linear causal relationships with health conditions and or comorbidities and encompass a systemic understanding of the role of health determinants in creating health Individual collective and structural ecological approaches can better reduce health inequities Moreover engaging the presumed beneficiaries from such strategies ensures that actual needs are identified and choices are context specific It improves the whole implementation process as well as its results Higher levels of participation such as co creation imply a bottom up voluntary collaborative process rooted in values of diversity mutual trust openness autonomy freedom and respect as well as shared expertise responsibility and decision making which are essential values in co creating health promotion

### **Towards a Psychophysiological Approach in Physical Activity, Exercise, and Sports, volume III** Pedro

Forte, Daniel Leite Portella, José Eduardo Teixeira, Diogo Monteiro, 2025-01-06 In recent years there has been a growing

recognition of the profound interconnection between mental health cognition and physiological responses in the context of physical activity exercise and sports This heightened awareness has prompted a paradigm shift towards embracing a holistic psychophysiological perspective in research within this field Volume III of this Research Topic delves deeper into the intricate relationship between psychological factors such as depression anxiety and motivation and their impact on physiological variables during physical activity exercise and sports performance Through a comprehensive exploration of this multidimensional interplay we aim to advance our understanding of how cognition education and psychological well being intersect with physiological responses By examining the nexus of mental health cognition and physiological variables we aim to shed light on the underlying mechanisms driving performance behaviour and overall well being in athletes and individuals engaged in physical activity We invite contributors to uncover new insights and pave the way for innovative approaches to enhancing performance promoting well being and addressing mental health challenges in the realm of physical activity exercise and sports

**Social Innovation in Sport** Anne Tjønndal, 2021-02-15 This book provides fresh insights on how social innovations are utilized as strategies to make sport more accessible and inclusive It does so by bringing together theoretical insights and empirical studies from Norway Sweden Denmark the United States Australia Turkey and Belgium Within the overarching topic of social innovation in sport this book covers contemporary themes such as digitalization urban planning gender equality and innovation in sport policy and practice It will be of interest to researchers and students in the fields of sociology of sport sport management sport science and sociology
