CrS Report On Defense Budget Process:

The Federal Budget Process, V.2 Bill Heniff Jr., Robert Keith, Megan Lynch, 2018-06-20 Budgeting for the federal government is an enormously complex process. It entails dozens of subprocesses, countless rules and procedures, the efforts of tens of thousands of staff persons in the executive and legislative branches, and the active participation of the President, congressional leaders, Members of Congress, and members of the executive branch. This analysis shows the various elements of the federal budget process, including the President's budget submission framework, timetable, the budget resolution, reconciliation, the Byrd Rule, appropriations, authorizations, and budget execution. Congress is distinguished from nearly every other legislature in the world by the control it exercises over fashioning the government's budgetary policies. This power, referred to as the power of the purse, ensures Congress's primary role in setting revenue and borrowing policies for the federal government and in determining how these resources are spent. The congressional power of the purse derives from several key provisions in the Constitution: Article I, Section 8, Clause 1 (Power to tax and spend) declares in part that Congress shall have the power to raise that is to lay and collect revenues of various types, including taxes and duties, among other things; Article I, Section 8, Clause 2 (Borrowing power) declares that the power to borrow funds on the credit of the United States belongs to Congress. In addition to its powers regarding revenues and borrowing, Congress exerts control over the expenditure of funds. Article I, Section 9, Clause 7 declares in part that funds can be withdrawn from the Treasury only pursuant to laws that make appropriations. Under the Constitution, revenue measures must originate in the House of Representatives. Beyond this requirement, however, the Constitution does not prescribe how the House and Senate should organize themselves or the procedures they should use to conduct budgeting. Over the years, however, both chambers have developed an extensive set of rules, some set forth in statute and precedents that lay out complicated multiple processes for making budgetary decisions. The House and Senate have also created an intricate committee system to support these processes. As American society has grown and become ever more complex, and as the role of the federal government in the national economy has steadily expanded, Congress also has increasingly shared power over budgetary matters with the president and the executive branch. It has refashioned the president's role in budgeting by requiring him to submit to Congress each year a budget for the entire federal government and giving him responsibilities for monitoring agencies' implementation of spending and revenue laws. Accordingly, the president also exercises considerable influence over key budget decisions.

Appropriations , *Congress of the United States* Carol S. Plessner, 2007 This new book focuses on the Congress of the United States which has evolved continuously since its founding Although critics abound both in and outside congress itself it is most certainly true that the tasks and responsibilities assigned to Congress present a challenge to an organisation which is sometimes unwieldy to say the least Information has become so ubiquitous in the age of the internet that Congress seems to struggle to keep up Congress is largely run by the permanent staff which is now in excess of 30 000 people It is pushed pulled and jerked by lobbying groups whose interests are more often than not in opposition to the best interests of the majority of the population

Managing the Military Sharon K. Weiner, 2022-11-15 The chairman of the Joint Chiefs of Staff JCS a senior group of officers who lead the Army Navy Air Force and Marine Corps is perhaps the most influential military figure in the United States The chairman is the primary military advisor to the president and is often the public face of the armed forces As advocates for the military s priorities some chairmen have used this role to help shape policy but others have embraced the position as an opportunity to chart new policy directions or challenge presidential preferences Managing the Military is a pioneering analysis of the power of the chairman of the JCS that sheds new light on civil military relations in the United States Using detailed case studies of debates over defense budgets since the end of the Cold War Sharon K Weiner

examines when and how the JCS chairman opposes civilian defense policy preferences She shows that under the right conditions the chairman can be a policy entrepreneur challenging the goals of the White House and lobbying for the military's interests However the extent of the chairman's political clout is constrained by the preferences of the service chiefs who head the branches of the military Weiner also explores the evolution of the institution of the JCS and illuminates the chairman's interaction with the president and secretary of defense Blending empirical detail and theoretical contributions *Managing the Military* offers a compelling account of the circumstances under which the power of the JCS chairman is maximized Analysis of the Dynamics of the Job Creation Process in the United States and an Evaluation of Medium and Long Term Prospects: Public policy, entrepreneurship and the U.S. job creation experience Rodney Stares, Richard Barry Freeman, Corporation for Enterprise Development, 1987

The United States has adjusted to the post 1973 era of structural economic change with far greater employment growth than any comparable European nation several of which actually lost jobs For this reason policymakers in Europe are looking to the U S experience for signals on how they might intervene to improve their own employment situation Policy prescriptions range from exclusive attention to rigidities affecting the supply of labor to policies to remedy the problem through conventional macroeconomic policies In this paper we examine the U S job creation experience from 1970-1984 in the hope of illuminating at least some of the policy prescriptions that do and do not appear to explain the U S's relative good fortune over this period Volume II then takes a look at various explanations put forward of how public policy in the U S has contributed to our job growth and attempts to separate the wheat from the chaff Explanations covered are taxation deregulation federal expenditures including defense health care human capital and the overall effect of macro economic policy and support for entrepreneurship at the federal state and local levels **An**

CRS Report for Congress Pat Towell, Congressional Research Service: The Libr, Stephen Daggett, 2013-11. The annual consideration of appropriations bills, regular continuing and supplemental by Congress, is part of a complex set of budget processes that also encompasses the consideration of budget resolutions, revenue and debt limit legislation, other spending measures and reconciliation bills. In addition, the operation of programs and the spending of appropriated funds are subject to constraints established in authorizing statutes. Congressional action on the budget for a fiscal year usually begins following the submission of the President's budget at the beginning of each annual session of Congress. Congressional practices governing the consideration of appropriations and other budgetary measures are rooted in the Constitution, the standing rules of the House and Senate and statutes such as the Congressional Budget and Impoundment Control Act of 1974. This report is a guide to one of the regular appropriations bills that Congress considers each year. It is designed to supplement the information provided by the House and Senate Appropriations Subcommittees on Defense. For both defense authorization and appropriations, this report summarizes the status of the bills, their scope, major issues, funding levels and related congressional activity. This report is updated as events warrant and lists the key CRS staff relevant to the issues covered as.

Economic Policies Lawrence P. Neely, Patricia V. Lerner, 2008. Economic policies refer to the actions that governments take in the economic field. It covers the systems for setting interest rates and government deficit as well as the labour market, national ownership and many other areas of government. Such policies are often influenced by international institutions like the International Monetary Fund or World Bank as well as political beliefs and the consequent policies of parties. This book presents the latest hot issues in the field. *Studies in Taxation, Public Finance, and Related Subjects*, 1982. Studies prepared for the U.S. Congress by the Congressional Research Service, CRS Library of Congress.

Public Lands William E. Neeley, 2007. There is a great amount of debate concerning the establishment and use of public lands. While there is a desire for recreational areas and parks, there are also considerations for the preservation of wilderness and wildlife. National parks must determine rules regarding the use of off-road vehicles, personal watercrafts, snowmobiles and the implementation of hiking trails. This book examines the growing diversity of recreation on federal lands and the resulting impact on the environment.
