Crystal Meth Addiction Brent Lewicki, 2015-04-06 Crystal meth is reported to be one of the most abused substances in the world And although it isn't always easy to tell who is addicted to meth at first glance given the statistics it is very likely that you know someone who is Crystal meth users are actually able to go about seemingly normal lives They can maintain successful careers or get decent enough grades to stay in school at least until they get too deep into the addiction and it becomes too late Now if you are certain that you someone you love is abusing crystal meth you may already realize that it's not going to be an easy journey to get them to overcome their addiction This book is going to help you understand what your loved one is going through and how to properly support them and help them get over the addiction I will explain how to confirm whether or not someone is addicted to meth and then what to do and just as important what not to do when talking to and relating to a user You'll also learn when and how to get outside help and exactly how to help a recovering addict avoid situations that could lead him back to the habit Helping a loved one overcome an addiction is not an easy task but it is a necessary one and it all starts with knowing what to do

Crystal Channeling and Its Application at High-Energy Accelerators Valery M. Biryukov, Yuri A. Chesnokov, Vladilen I. Kotov, 2013-03-09 Nature performs not hing vainly and makes nothing unnecessary Aristotle Interest in the passage of charged particles through crystals first appeared at the beginning of this century following experiments on x ray diffraction in crystallattices which provided the proof of an ordered distribution of atoms in a crystal Stark 1 put forward the hypothesis that certain directions in a crystal should be relatively transparent to charged particles These first ideas on the channeling of charged particles in crystals were forgotten but became topical again in the early 1960s when the channeling effect was rediscovered by computer simulation 2 and in experiments 3 that revealed anomalously long ion ranges in crystals The orientational effects during the passage of charged particles through crystals have been found for a whole range of processes characterized by small impact parameters for collisions between particles and atoms nuclear reactions large angle scattering energy losses Lindhard explained the channeling of charged particles in crystals 4 The results of the numerous investigations into the channeling of low energy amounting to several MeV charged particles in crystals have been summarized in several monographs and reviews 5 81
