

Integrating Crystal Reports with Visual FoxPro

Overview

In this session, you will learn how to seamlessly integrate Crystal Reports into your Visual FoxPro application. Crystal Reports give the developer full control over programmatically creating, modifying, printing, and exporting reports.

Integration Basics

For many years, Crystal Reports has provided developers with the capabilities to integrate reports into applications. The current integration method, the Report Design Control (RDC) is the method recommended by Crystal Decisions. It consists of four main part.

- Designer Runtime Library (CRAXDRT.DLL). The primary integration method. A COM Automation server that provides report manipulation, printing, and exporting capabilities.
- Designer Design and Runtime Library (CRAXDRT.DLL). This component provides all the features of the CRAXDRT.DLL and supports the Distributable Report Designer.
- Report Viewer. An ActiveX control used to preview reports.
- Distributable Report Designer. An ActiveX control used to give users report design capabilities.

Before using the CRAXDRT.DLL, you should register the component with Visual FoxPro's Intellisense Manager. This will allow all the properties, methods, and events, to be selected using Intellisense. The following steps guide you through this registration process:

1. From the Visual FoxPro menu, select Tools | Intellisense Manager.
2. Select the "Types" tab.
