

4th GRADE LESSON PLANS

GEOMETRY

Day Seven

Guided Instruction:
Instruction page to each student. Students will cut the shapes, notebook or on a piece of paper. Remind students to only put a that they will be able to fold the triangle up to read information on the front of each shape, write the type of triangle. Under the flap, write information about the triangle.

Notes:

scissors + glue

Collaborative Instruction:
with a partner. Each pair will need one dry erase board, marker or a triangle on their board. Then, the other person will identify the triangle and whether it is a right, isosceles, or obtuse triangle. The other person will offer feedback, as necessary. Then, roles. Repeat for approximately 10 minutes.

Notes:

partners - Gabe, Joel + Gavin will
team of 3

Names: Marissa + Janelle

Cscope Lessons On 4th Grade Geometry

George Anthony Hill

Cscope Lessons On 4th Grade Geometry:

Geometry, Grades 4 - 5 Tiffany Moore, 2007-09-03 Filled with high interest activities this series fully supports NCTM standards and features lessons and assessments that prepare students to take their studies to the next level It covers fundamental geometry topics and skills that include polygons circles angles and lines triangles graphing area and perimeter volume and more

Geometry, Grades 4 - 5, 2012-09-01 Building a solid foundation for understanding geometry the lessons in this book focus on shapes perimeter and area circumference congruence and symmetry volume as well as angles Supports NCTM standards

4th Grade Geometry Merissa Naipaul, 2003-12-15 A variety of stimulating curriculum correlated activities help learners succeed in the 4th grade math classroom and teacher support makes it easy to implement mathematics standards Geometry offers narrow focus on the concepts and skills that help develop a strong foundation in mathematics Valuable pre and post assessments aid teachers in individualizing instruction diagnosing the areas where students are struggling and measuring achievement

Geometry, Grade 4 Mary Rosenberg, 2004-10-13 Both teachers and parents appreciate how effectively this series helps students master skills in mathematics and language arts Each book provides activities that are great for independent work in class homework assignments or extra practice to get ahead Test practice pages are included in most titles

Introduction to Geometry, Grades 4 - 5, 2014-12-01 Skill Builders are great tools for keeping children current during the school year or preparing them for the next grade level A variety of fun and challenging activities provides students with practice and helps introduce basic skills to new learners This full color workbook contains appropriate passages and exercises based on national standards for fourth and fifth grade to help ensure that children master geometry math skills before progressing Skill Builders combines entertaining and interactive activities with eye catching graphics to make learning and reviewing fun and effective The compact 6 x 9 size makes this book perfect for school at home or on the go It features 80 perforated reproducible pages and an answer key

Geometry, Grade 4 Workbook Maria Miller, 2016-02-05 We start Geometry Grade 4 Workbook by reviewing the concepts of area and the perimeter of rectangles third grade topics Students get to apply these concepts in problem solving including problems where they write simple equations and explore possible perimeters for a given fixed area The focus of this workbook is angles Students learn about lines rays and angles and about acute right obtuse and straight angles Next they learn how to measure and draw angles with a protractor We also study angle problems where students write simple equations and estimate some common angles The lesson Parallel and Perpendicular Lines ties in with the topic of angles because perpendicular means to be at a right angle Next we study parallelograms and other quadrilaterals in more detail paying attention to the angles and side lengths in them We study triangles and classify them according to the angles The last topic for this workbook an easy one is line symmetry The study of geometry is full of strange sounding words to learn I encourage you to let the student s keep a geometry notebook where they will write every new concept or term and draw a picture or pictures and text to

explain the term The students could also do the drawing exercises from this workbook in this notebook It will then become their very own geometry book and while working with it it helps them to learn and remember the terms and concepts better
