Victorian Nightshades Elizabeth A. Campbell, 2025-03-27 A darkly alluring plant family and the arrival of modernity Victorian Nightshades tells the story of how one plant family notorious for centuries in England because of its frequently psychoactive and poisonous properties rose to social and economic prevalence during the nineteenth century Beginning with bittersweet and belladonna the Old World species associated with evil witchcraft and dangerous women in an era when traditional botanical beliefs not only assigned morality to plants but also gendered them Campbell then moves to the ubiquitous potato and tobacco before concluding with four of the Solanaceae that achieved the widest national favor by the end of the century the ornamental petunia and the edible pepper eggplant and tomato The story of the nightshades exposes the conflicts between science and popular sentiment and between knowledge and received opinion that defined the nineteenth century Campbell compellingly details how advances in medical and botanical knowledge evolutionary theory and the vagaries of human desire transformed the Solanaceae from a plant family plagued by fear and hostility in the British imagination to one of cultural favor and celebration by the turn of the century encapsulating the Victorian era's course to modernity *The Economist*, 1927 **Who's who Among Students in American Universities and Colleges** Henry Pettus Randall, 1971 **Illinois Alumni News**, 1920 **The Alumni Quarterly and Fortnightly Notes**, 1919 The Alumni Quarterly and Fortnightly Notes of the University of Illinois, 1920 **Realty and Building**, 1990 **Who's who in America** John W.
