

Engine

The 2.7-litre V6 biturbo

This engine will also be used in the Audi S4 and Audi A6.

The engine used in the A6 has a comfort-oriented setup, which means that it has different torque and power output. This effect was principally achieved by modifying the software configuration of the engine control unit.

A tuning protective device prevents the S4 engine control unit being installed in the A6!

This prevents misuse, which can result in damage to the drivetrain!

An auxiliary heater is not available as an option for the S4 and the A6, due to the constraints on space.
