

INSTALLATION MANUAL

Before you begin installation

- Read the INSTRUCTIONS!
- Always use a multi-meter when verifying vehicle wiring.
- Before mounting, verify the customer's desired location for the valet switch and LED.
- Always look before drilling. Make sure you will not damage vehicle hoses, electrical looms or exterior body panels.

Installation Notes

- Make all wiring connections to the vehicle before connecting the harness to the main unit.
- Mount the main unit in a secure area, away from vehicle computers and heating/air conditioning ducts. The location should be convenient for your installation, but hidden from thieves. Mount the unit as far away from metal objects as possible to increase the range of the remote transmitters. Do not install the main unit in the engine compartment.
- When running the harness wires through the vehicle, be careful to run them where they cannot be damaged or shorted. Keep them away from any moving parts or areas of high heat. Use rubber or plastic grommets to protect the harness wires where they pass through holes in metal panels.
- Secure the shock sensor to the steering column, thick wire harness or a dash brace, using a wire tie. Make sure that the adjustment screw is accessible for later testing and adjustment.
