Why study CHEMISTRY?

1. When you first begin studying to become a cosmetologist, what you will find is that you will be learning about chemistry! During your studies, you will find that it is important for you to learn the foundations of chemistry.
Personally, I am a very curious person and I am interested in the study of chemistry and why it works, and you will find that it is not just a matter of learning about it, but you will find that it is a very important part of your studies.

2. Let us now turn to the study of chemistry and understand chemistry as a science.
 - a. Without an understanding of basic chemistry, you would not be able to use professional products effectively and safely.
 - b. Every product used in the salon and in cosmetology services contains some type of chemical.
 - c. When studying chemistry, you will find that you will find that it is a very important part of your studies.
 - d. problems you may encounter with chemical services.

Recognize How the Science of Chemistry Influences Cosmetology

1. Chemistry is the science that deals with the composition, structure, and properties of matter and how these change under different conditions.
2. Organic chemistry is the study of substances that contain the element carbon.

Chapter 12 Workbook Pages Chemistry:

Chemistry (Teacher Guide) Dr. Dennis Englin, 2018-02-26 This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized, and is their source of accountability along the way. With that in mind, this guide provides additional help through the laboratory exercises as well as lessons, quizzes, and examinations that are provided along with the answers. The lessons in this study emphasize working through procedures and problem solving by learning patterns. The vocabulary is kept at the essential level. Practice exercises are given with their answers so that the patterns can be used in problem solving. These lessons and laboratory exercises are the result of over 30 years of teaching home school high school students and then working with them as they proceed through college. Guided labs are provided to enhance instruction of weekly lessons. There are many principles and truths given to us in Scripture by the God that created the universe and all of the laws by which it functions. It is important to see the hand of God and His principles and wisdom as it plays out in chemistry. This course integrates what God has told us in the context of this study.

Features
Each suggested weekly schedule has five easy-to-manage lessons that combine reading and worksheets. Worksheets, quizzes, and tests are perforated, and three-hole punched materials are easy to tear out, hand out, grade, and store. Adjust the schedule and materials needed to best work within your educational program. Space is given for assignments, dates. There is flexibility in scheduling. Adapt the days to your school schedule.

Workflow
Students will read the pages in their book and then complete each section of the teacher guide. They should be encouraged to complete as many of the activities and projects as possible as well. Tests are given at regular intervals with space to record each grade.

About the Author
DR DENNIS ENGLIN earned his bachelor's from Westmont College, his master of science from California State University, and his EdD from the University of Southern California. He enjoys teaching animal biology, vertebrate biology, wildlife biology, organismic biology, and astronomy at The Master's University. His professional memberships include the Creation Research Society, the American Fisheries Association, Southern California Academy of Sciences, Yellowstone Association, and Au Sable Institute of Environmental Studies.
