Segregation of domestic waste into biodegradable and non-biodegradable by households, garden waste to be converted to compost; sewage treatment plants.

19.1 WHAT IS A WASTE ?

Waste is any substance which is discarded after primary use, or it is worthless, defective and of no use.

Ever since the human society has been evolving with huge population growth, there has been ever-increasing demand for the primary needs of food, shelter and clothing, etc. This has led to the rapidly increasing size and number of towns, cities, large agricultural fields, storage godowns, factories, interconnecting roads, railways and so on. With these, there has also been increasing use of electricity, firewood, petroleum and even nuclear energy. All this is leading to more and more human body wastes, livestock wastes, discarded equipments, agricultural wastes, etc. Efficient methods of their disposal are being continuously improved.

19.2 CATEGORIES OF WASTES

Broadly there are five major categories of waste:

- (i) **Domestic waste** given out from homes,
- (ii) **Industrial waste** given out from factories, thermal plants, etc.,
- (iii) **Agricultural waste** that is left behind after obtaining the consumable parts,
- (iv) **Municipal waste** which includes the overall waste given out from the township, and
- (v) **e-waste (electronic waste)** from electrical and electronic equipment.

19.2.1 DOMESTIC WASTE :

An average home produces the following types of wastes :

(i) **Kitchen waste :** Several items such as :

- Peelings of vegetables and fruits,
- Shells taken off from ground nuts and other dry fruits, and from eggs
- Washing of pulses, rice, etc. before cooking,
- Any stale or rotten non-usable food items, used tea leaves
- Any left overs in the food dishes.

(ii) **Plastics :**

- Plastic packings and wrappings
- Discarded used and broken plastic objects including toys, etc.

(iii) **Glass :**

- Broken glass utensils, mirrors, containers, window panes, electric bulbs.

(iv) **Rags :**

- A huge variety of waste pieces of cloth, torn towels, handkerchiefs, etc.
- Old bed sheets, blankets, cushions.
- Discarded worn out clothing and footwear, curtains, and so on (Some of these are reused by the poor, or are sold off to the "raddiwalas").

(v) **Paper :** The daily newspapers and magazines are a very common waste (which are generally sold off to "raddiwalas" who pass them on for a variety of use). Such waste paper is even recycled for their reuse in some way in paper industry.
