1. What is a common responsibility of a level one call center technician?

- **entering a concise description of a customer problem into a ticketing system ***
- remotely connecting to customer devices and implementing driver and software updates
- calling back customers and asking additional questions to solve the problem
- receiving escalated work orders from a lower level technician

Explanation: The primary responsibility of a level one technician is to gather pertinent information from a customer and to enter the information into a work order or ticket system.

2. Which two programming languages require the program to be converted into executable code using a compiler? (Choose two.)

- PowerShell
- VBScript
- **C# ***
- **Java ***
- Python

Explanation: Compiled languages like C, C++, C#, and Java need to be converted into executable code using a compiler.

3. A programmer used an operator to compare values within a program and the resulting logical data type was "false". Which test condition would have provided the result of "false"?

- **8 != 8**
- 4 >= 1
- 6 <= 6
- 3 == 3

Explanation:

= represents equal

!= represents not equal

< represents less than

> represents greater than

<= represents less than or equal to

>= represents greater than or equal to

Because 8 is equal to 8, and the != operator is used, the resulting output is "false".

4. What is the definition of a script file?

- A simple file with a single statement that loops repeatedly.
- A file that is compiled and translated into machine language before executing.
- **A simple text file used to automate processes and tasks. ***
- A file that is the output of a conditional statement.

Explanation: A script file is a simple text file written in a form of scripting languages to automate processes and tasks on various operating systems. The commands can be entered
