

Name \_\_\_\_\_

When communicating between machines on different networks, packets are sent via the default gateway on the way into and out of the LAN. The routing is done using (Layer 3) IP addresses. If the computers on the same network, then the IP address gets resolved to a (layer 2) Media Access Control (MAC) address to communicate with the computer. The MAC addresses are hard-coded onto the Ethernet card by the company that made the card.

The ability to retrieve and change your IP configuration is an important skill. In this lab, you will use the `ipconfig` command in Windows to view the configuration information. You will then use the Local Area Connection Properties window to change the IP address in Windows.

Computers use both MAC and IP addresses to communicate with one another across networks. In this lab, two computers will "talk" to each other via ping messages. You will then modify the Address Resolution Protocol (ARP) table of one of the computer to demonstrate the relationship between the IP and MAC addresses for a machine.

The ping (Packet Internet Groper) is a basic utility that is used for testing the connectivity between two computers. This message name was derived from the sound that sonar on a submarine makes and is used in a similar way. A "signal" or request is sent out to probe for the existence of the target along a fixed "distance." The distance between two computers can be measured using time to live (TTL). The TTL is decremented by at least one for each router it passes through, also known as a hand-off point or (HOP). It may be decremented by more than one if the router holds on to it for more than one second, which rarely is the case. Ping operates using Internet Control Message Protocol (ICMP) to test for connectivity; so, in case where ICMP is restricted, the ping utility may not be useful. Ping is usually implemented using ICMP echo messages, although other alternatives exist.

When you use the ping command in this lab, you will see that although you are using the IP address as the target of the ping, it is actually the MAC address that is used to communicate with that computer. IP addresses are used to transfer data from one network to another, whereas MAC addresses are used to send information from one device to another on the same network. It is ARP that resolves the IP addresses to their associated MAC addresses. ARP is a Transmission Control Protocol/Internet Protocol (TCP/IP) tool that is used to modify the ARP cache. The ARP cache contains recently resolved MAC addresses of IP hosts on the network. The utility used to view and modify the ARP protocol is also called arp.

# Chapter 13 Lab Decoding Messages

**Milton A. Cohen**

## Chapter 13 Lab Decoding Messages:

Algebra: Themes, Tools, Concepts -- Teachers' Edition Henri Picciotto, Anita Wah, 1994      **Data Structures and the Standard Template Library** William Joseph Collins, 2003 DATA STRUCTURES AND THE STANDARD TEMPLATE LIBRARY by William Collins teaches the fundamentals of Data Structures and their implementations It uses C as the language of instruction Most of the data structures are provided in the Standard Template Library STL which students will be able to use in their further coursework and beyond To further students understanding of implementation issues alternative implementation other than the STL are also discussed Hands on learning is promoted throughout the text by the use of Programming Projects and labs Programming projects at the end of each chapter allow students to develop and implement their own data structures or to extend or apply data structures introduced in the chapter Additionally optional labs accompany the text and allow students to practice by giving them opportunities to code These labs can be used in many different ways such as in a closed lab in an open lab or for optional homework assignments Publisher description

**Hemingway's Laboratory** Milton A. Cohen, 2005 Illuminates the development of Hemingway s themes and techniques and his future course as a stylist and writer In 1924 Ernest Hemingway published a small book of eighteen vignettes each little more than one page

long with a small press in Paris Titled in our time the volume was later absorbed into Hemingway s story collection In Our Time Those vignettes as Milton Cohen demonstrates in Hemingway s Laboratory reveal a range of voices narrative strategies and fictional interests more wide ranging and experimental than any other extant work of Hemingway s Further they provide a vivid view of his earliest tendencies and influences first manifestations of the style that would become his hallmark and daring departures into narrative forms that he would forever leave behind Many of the chapters are pointillistic glimpses of violence bullfights a botched execution the fleeting thoughts of the wounded on the battlefield Others reach back into childhood Still others adopt the wry mannered voice of English aristocracy Though critics have often read these chapters as secondary asides to the longer stories that constitute the commercial collection Cohen argues that not only do the vignettes merit consideration as a unit unto themselves but that they exhibit a plethora of styles and narrative gambits that show Hemingway at his most versatile The final section examines in detail the individual chapters of in our time their historical origins their drafts themes and styles The result is an account of what is arguably Hemingway s most crucial formative period

## Unveiling the Energy of Verbal Artistry: An Mental Sojourn through **Chapter 13 Lab Decoding Messages**

In a global inundated with monitors and the cacophony of instant interaction, the profound energy and emotional resonance of verbal art often disappear in to obscurity, eclipsed by the continuous barrage of sound and distractions. Yet, nestled within the lyrical pages of **Chapter 13 Lab Decoding Messages**, a fascinating work of literary brilliance that impulses with fresh thoughts, lies an remarkable journey waiting to be embarked upon. Published with a virtuoso wordsmith, that interesting opus guides readers on an emotional odyssey, gently revealing the latent potential and profound influence embedded within the elaborate internet of language. Within the heart-wrenching expanse of the evocative analysis, we will embark upon an introspective exploration of the book is central themes, dissect its charming publishing style, and immerse ourselves in the indelible effect it leaves upon the depths of readers souls.
