Teaching School Mathematics: Algebra Hung-Hsi Wu, 2016-08-10 This is a systematic exposition of introductory school algebra written specifically for Common Core era teachers The emphasis of the exposition is to give a mathematically correct treatment of introductory algebra For example it explains the proper use of symbols why variable is not a mathematical concept what an equation is what equation solving means how to define the slope of a line correctly why the graph of a linear equation in two variables is a straight line why every straight line is the graph of a linear equation in two variables how to use the shape of the graph of a quadratic function as a guide for the study of quadratic functions how to define a parabola correctly why the graph of a quadratic function is a parabola why all parabolas are similar etc This exposition of algebra makes full use of the geometric concepts of congruence and similarity and it justifies why the Common Core Standards on algebra are written the way they are Rational Numbers to Linear Equations Hung-Hsi Wu, 2020-06-18 This is the first of three volumes that together give an exposition of the mathematics of grades 9 12 that is simultaneously mathematically correct and grade level appropriate The volumes are consistent with CCSSM Common Core State Standards for Mathematics and aim at presenting the mathematics of K 12 as a totally transparent subject The present volume begins with fractions then rational numbers then introductory geometry that can make sense of the slope of a line then an explanation of the correct use of symbols that makes sense of variables and finally a systematic treatment of linear equations that explains why the graph of a linear equation in two variables is a straight line and why the usual solution method for simultaneous linear equations by substitutions is correct This book should be useful for current and future teachers of K 12 mathematics as well as for some high school students and for education professionals **Eureka Math, A Story of Ratios: Grade 8, Module 4** Great Minds, 2014-02-17 Common Core Eureka Math for Grade 8 Module 4 Created by teachers for teachers the research based curriculum in this series presents a comprehensive coherent sequence of thematic units for teaching the skills outlined in the CCSS for Mathematics With four color illustrations complete lesson plans and reproducible student worksheets and assessments this resource is uniquely designed to support teachers in developing content rich integrated learning experiences that adhere to established standards and encourage student engagement Developed by Common Core a non profit advocacy group dedicated to producing content rich liberal arts curricula for America s K 12 schools Common Core
