Wechsler, 2017-09-29 In *The Qualified Student* Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions

White, 2017-01-01 In *Constructing Policy Change* Linda A White examines the expansion of early childhood education and care ECEC policies and programs in liberal welfare states including Australia Canada New Zealand the UK and the USA In the first part of the book the author investigates the sources of policy ideas that triggered ECEC changes in various national contexts This is followed by a close analysis of cross national variation in the implementation of ECEC policy in Canada and the USA White argues that the primary mechanisms for policy change are

most robust strategy for reimbursing schools A second problem seen in California was a decrease in the qualification level of the kindergarten through third teacher workforce The largest decrease were in schools with higher concentrations of low income or minority students Modeling the flow of K 3 teachers during the first year of CSR shows within district transfers create more vacancies in schools with more minority students Vacancies were then more likely to be filled with unqualified teachers Potential policy responses to this problem are to not fill classrooms created by CSR with transfer teachers and to provide incentives for teachers to remain in schools that are difficult to staff *ERS Spectrum* ,1989 **State English Standards** Sandra Stotsky,1997 **Education State Rankings 2008-2009** CQ Press,2008-09-15 Compares the 50 states in hundreds of preK 12 education categories Categories include reading and math scores teachers salaries graduation rates per pupil spending special education and class size **Journal of the Senate, State of Florida** Florida.
