Common Core Slo Math Problem Solving:

Implementing the Common Core State Standards Through Mathematical Problem Solving Mary Q. Foote, Darrell Earnest, Shiuli Mukhopadhyay, 2014 The 38 problems and tasks for students in this book are organized into the major areas of the Common Core for grades 3-5: operations and algebraic thinking, number and operations in base ten, fractions, measurements and data, and geometry. For each task, teachers will find a rich, engaging problem or set of problems to use as a lesson starting point, with accompanying discussions that tie the tasks to specific Common Core domains and clusters. Follow-up sections highlight the CCSS Standards for Mathematical Practice students will engage in as they work on these problems.

Examples included in the 22 chapters highlight how we are preparing teachers across multiple contexts, e.g., within district in-content courses for the major and grade ranges K-20, and all chapters highlight relevant connections to the AMTE Standards for Preparing Teachers of Mathematics. Most importantly, this volume explores what we do not yet fully understand and where we are going. In essence, it considers how we can move the field forward. The 95 contributing authors range from graduate students to those who have served as leaders in the field in multiple ways for many years.
