Community Disaster Vulnerability Theory Research And Practice:

Community Disaster Vulnerability Michael J. Zakour, David F. Gillespie, 2012-11-13 Disaster vulnerability is rapidly increasing on a global scale particularly for those populations which are the historical clients of the social work profession These populations include the very young and very old the poor ethnic and racial minorities and those with physical or mental disabilities Social workers are increasingly providing services in disasters during response and recovery periods and are using community interventions to reduce disaster vulnerability There is a need for a cogent theory of vulnerability and research that addresses improved community disaster practice and community resilience Community Disaster Vulnerability and Resilience provides a unifying theoretical framework backed by research which can be translated into knowledge for effective practice in disasters

Belonging and Transnational Refugee Settlement

Jay Marlowe, 2017-09-11 The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781315268958> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license The image we have of refugees is one of displacement from their homes families and countries and yet refugee settlement is increasingly becoming an experience of living simultaneously in places both proximate and distant as people navigate and transcend international borders in numerous and novel ways At the same time border regimes remain central in defining the possibilities and constraints of meaningful settlement This book examines the implications of belonging in numerous places as increased mobilities and digital access create new global connectedness in uneven and unexpected ways Belonging and Transnational Refugee Settlement positions refugee settlement as an ongoing transnational experience and identifies the

importance of multiple belongings through several case studies based on original research in Australia and New Zealand as well as at sites in the US Canada and the UK Demonstrating the interplay between everyday and extraordinary experiences and broadening the dominant refugee discourses this book critiques the notion that meaningful settlement necessarily occurs in local places The author focuses on the extraordinary events of trauma and disasters alongside the everyday lives of refugees undertaking settlement to provide a conceptual framework that embraces and honours the complexities of working with the trauma story and identifies approaches to see beyond it This book will appeal to those with an interest in migration and diaspora studies human geography and sociology *Creating Katrina, Rebuilding Resilience* Michael J. Zakour, Nancy Mock, Paul Kadetz, 2017-11-13 *Creating Katrina Rebuilding Resilience* Lessons from New Orleans on Vulnerability and Resiliency presents a unique integrative understanding of Hurricane Katrina in the New Orleans area and the progression to disaster vulnerability as well as resilience pathways The book integrates the understanding of vulnerability and resiliency by examining the relationships among these two concepts and theories The disaster knowledge of diverse disciplines and professions is brought together in this book with authors from social work public health community organizing sociology political science public administration psychology anthropology geography and the study of religion The editors offer both expert and an insider perspectives on Katrina because they have lived in New Orleans and experienced Katrina and the recovery An improved understanding of the recovery and reconstruction phases of disaster is also presented and these disaster stages have been the least examined in the disaster and emergency management literature Interreligious Resilience Michael S. Hogue, Dean Phillip Bell, 2022-05-19 This book introduces the theory of interreligious resilience as a means to developing deeper and more effective interreligious engagement and resilience Michael S Hogue and Dean Phillip Bell advocate for interreligious resilience as the ability to grow through encounters with religious difference They argue that rather than the capacity to endure change and return to a normal status quo a deeper more complex resilience is characterized by an ability to learn through disturbances disruptions and uncertainty This book integrates theory and practice by situating the practical tasks of interreligious engagement in theological and social contexts It is systemic and multidimensional rather than staying focused on isolated interreligious issues or interpersonal interreligious encounters This book is essential reading for all religious leaders and other community leaders working with religious people in an interreligious world **Disaster Theory** David Etkin, 2014-12-26 *Disaster Theory An Interdisciplinary Approach to Concepts and Causes* offers the theoretical background needed to understand what disasters are and why they occur Drawing on related disciplines including sociology risk theory and seminal research on disasters and emergency management Disaster Theory clearly lays out the conceptual framework of the emerging field of disaster studies Tailored to the needs of advanced undergraduates and graduate students this unique text also provides an ideal capstone for students who have already been introduced to the fundamentals of emergency management Disaster Theory emphasizes the application of critical thinking in

understanding disasters and their causes by synthesizing a wide range of information on theory and practice including input from leading scholars in the field Offers the first cohesive depiction of disaster theory Incorporates material from leading thinkers in the field as well as student exercises and critical thinking questions making this a rich resource for advanced courses Written from an international perspective and includes case studies of disasters and hazards from around the world for comparing the leading models of emergency response Challenges the reader to think critically about important questions in disaster management from various points of view
