Contex Remote Codes:

The Remote Control in the New Age of Television James R. Walker, Robert V. Bellamy, 1993-08-23 Remote control tuning encourages a form of interactive television using a technology already available in 80 percent of American households Editors Walker and Bellamy have compiled the first book of state of the art research on a topic of growing interest to media researchers practitioners and students Chapter authors combine survey measurements with recorded observations of viewing behavior an analysis of the program sources accessed during grazing experimental studies of remote control use and historical and critical analyses Specific topics include the history of the remote control device gender differences in its use family communication and parental control of the device remote controls and selective exposure to media messages the impact of remote controls on programming and promotion remote controls and critical perspective on television and future technologies This volume is rooted in social scientific research but theoretically and methodologically broad in scope

Teaching Coding in K-12 Schools Therese Keane, Andrew E. Fluck, 2023-02-27 This book contains highly effective ways to teach coding and computational thinking skills throughout primary and secondary schooling It outlines a research informed path for students from birth to 18 years identifying key skills and learning activities Based on global perspectives and research at each stage it outlines how these findings can be applied in the classroom Teaching coding to students in K 12 has been a skillset that has been debated across educational jurisdictions globally for some time The book provides examples of schools that are teaching coding to students in engaging and relevant ways delivering well thought out compulsory curriculums Additionally it provides examples of schools where coding is not mandated in the curriculum and is taught in an ad hoc manner Through the full discussion of all of these varied examples the book presents both sides of the serious and ongoing debate in the field as to whether coding should be taught in an explicit way at all The increasing school of thought that teaching coding is a skill that is already obsolete and the focus should be on computational thinking is completely examined and presented In this book both sides of the argument as well as the specific meticulous research underlying each side are given equal weight The debate is a serious one and requires a clearly defined thematic response with evidence on all sides of the argument presented rationally This book does just that Created by carefully selected authors from around the world it will be a highly studied research reference *Managing Maritime Safety* Helle Oltedal, Margareta

Lützhöft, 2018-01-23 Shipping is a pillar of global trade with 90 per cent of the world's trade in goods and raw materials carried by ship Despite the economic benefits this delivers maritime operations can be dangerous and when accidents occur the consequences are serious Consequential outcomes from hazards at sea include serious injury death loss of cargo and destruction of the marine environment *Managing Maritime Safety* will give you a thorough understanding of contemporary maritime safety and its management It provides varying viewpoints on traditional safety topics in conjunction with critical discussions of the international safety management code and its application The book also offers new perspectives on

maritime safety such as ship and equipment design for safety and the relevance of safety management systems in particular the application of the International Safety Management code to remote controlled or autonomous ships The authors all work in the maritime industry as practitioners in education research government and classification The combination of wide ranging and extensive experience provides an unprecedented span of views with a strong connection to the real issues in the maritime domain This book sets out to provide much needed consolidated knowledge for university level students on maritime safety management incorporating theoretical historical research operational and design perspectives
