This is a highly sensitive (and usually controversial) topic for the mobile phone user. The discussion of these issues is not possible without first a highly technical discussion of the physics of cellular signals. In this section, I'll discuss the physics of the signal, the effects of the signal on the user, and the effects of the signal on the environment. I'll also discuss the effects of the signal on the user's health and the effects of the signal on the environment.

The extent of immigration to the various districts, particularly to the rapidly growing eastern district, is not easy to estimate, yet still for the authors of the present paper, it is certainly 2- and even 3-fold as high. These facts tend to indicate ethnic and ethnic-linguistic differences and differences in the patterns of the very early settlement of cities in Missouri, Illinois and Indiana. The idea is not as specific as the ethnic and linguistic and the social and political differences, but, generally, such facts are
