

### 3. Prepare burner

#### Removing/installing head assembly

**WARNING** Use care when handling burner components after the burner has been firing. Components can be hot and could cause severe personal injury.

You will need to remove the combustion head assembly for inspection of the assembly, replacement of the oil nozzle or adjustment of electrodes. To remove the assembly:

1. Loosen, and then rotate the two screw clamps securing the ignitor in place. Swing the ignitor plate open.
2. See Figure 7. Remove the blower shield by loosening the retaining screw on its front edge if needed for easier removal or insertion of the combustion head assembly.
3. Unscrew the oil line fitting and thumb nut at the burner housing.
4. Pull the threaded end of the oil tube into the blower housing.
5. See Figure 7. Rotate the combustion head assembly 180° so the electrodes are upside down. This places the electrode insulators out of the way for easy removal.
6. Remove the combustion head assembly by pulling the assembly up and out of the housing.
7. Handle the assembly with care to avoid bending/moving the electrodes, or damaging the electrode ceramic insulators.
8. Inspect the gasket on the bottom of the ignitor plate. The gasket prevents air from escaping from the housing. Replace the gasket if not in good condition.
9. Inspect the ignitor contact clips. Clean or replace if necessary to ensure reliable contact with the electrodes.

**Figure 7** Removing/inserting combustion head assembly

Remove blower access cover if necessary for easier insertion or removal of combustion head assembly.

Rotate oil tube 180° to simplify removal of combustion head assembly.

To replace the combustion head assembly, reverse the sequence.

- Remember to put the assembly in upside down, so the electrode insulators are out of the way. Remove, then replace, the blower shield if necessary for easier removal/insertion of the assembly.
- See Figure 8. For 99FRD or 100CRD burners, you will have to lift the end of the assembly to guide it through the throttle at the end of the air tube. **DO NOT FORCE.**

**CAUTION** Use care when tightening the oil line fitting to oil tube extension. Tighten securely, but do not cross-thread or over-tighten.

**Figure 8** Inserting combustion head assembly

#### Install nozzle/check electrodes

1. Loosen the clamp screw on the retention ring assembly (see Figure 10, page 10). Slide the retention ring assembly off of the nozzle adapter. Then loosen electrodes to rotate out of the way.
2. Install and tighten the nozzle shown in Table 1, page 3, for retrofit applications. Install the nozzle given in the appliance manual when application information for the 99FRD, 100CRD, and 102CRD oil burner is given.
3. Hold the nozzle adapter securely when removing or replacing the nozzle (Figure 9). Take care not to damage the electrode insulators or to bend the electrodes in the process.

**Figure 9** Carefully support the nozzle adapter when installing or removing nozzle
