

# Oreo Cell Cycle Student Worksheet

## Materials Needed:

- 6 Oreo Cookies (per group)
- 2 Tablespoons assorted color rod-shaped candy sprinkles
- 6 Toothpicks (2 per group member)
- 3 paper towels (1 per group member)

## Directions:

- 1) Using your textbook or other classroom resources, find an image of the cell cycle that includes: **interphase**, **mitosis** (**prophase**, **metaphase**, **anaphase** and **telophase**) and **cytokinesis**.
- 2) Using the image you found, you will create a model for each stage of the cell cycle listed above.
- 3) If your group has two members, each member will model three stages. If your group has three members, each member will model two stages of the cell cycle.
- 4) Carefully remove the top cookie from all six cookies by twisting the top cookie in a circular motion while holding the bottom cookie with your other hand. The bottom cookie with the cream filling attached will be used for your models (Note: You may eat the top cookie, or lay it aside.).
- 5) The cream filling represents the cytoplasm of the cell. You must create the structures inside the cell that play a role in the cell cycle using candy sprinkles.
- 6) The toothpicks may be used to remove or divide the cytoplasm or to move around the sprinkles.
- 7) Once you have created a model for each stage of the cell cycle, summarize what is happening in each stage in the table below.

Stage		Summary of Important Events
Interphase		The cell grows, duplicates DNA, and double checks if the DNA was duplicated correctly.
Prophase	<div>Mitosis</div>	The chromosomes and spindle fibers become visible.
Metaphase		The chromosomes line up in the middle of the cell so they can be pulled to the opposite sides of the cell.
Anaphase		The spindle fibers pull the chromatids to the opposite sides of the cell.
Telophase		Two new nuclei form and the cell begins to separate.
Cytokinesis		The cell splits into two.
