Soul Search David Darling, 2013-06 What happens when we die Does everything we are just stop Is consciousness lost forever Or does some vital spark inside us a spirit or a soul live on We find it almost impossible to think about not having a mind of our awareness being snuffed out like a candle Yet the stark fact is that within a century or so everyone alive today all six billion of us will be dead Humans are the only creatures on earth that know they are going to die But that foreknowledge has come fairly recently and it flies in the face of four billion years of evolution Those eons have genetically conditioned us to do all we can to preserve ourselves and our kin The result is that we are caught in a dilemma We are programmed to survive by our genes yet made painfully aware of our mortality by our forward looking brain If we admit that death is inevitable then our will to survive may be fatally weakened On the other hand if we deny death we have to turn a blind eye to a patent fact of the real world Only one avenue of escape is possible belief in an afterlife With this we can face the nightmare that death poses to the rational mind We distance ourselves from death by institutionalizing it Whereas in earlier times most people spent their last days at home in the bosom of family and friends today four fifths of us are removed to hospitals or nursing homes We are hidden from the gaze of the young and healthy and tended to by strangers As the end approaches we are discreetly moved to wards for the terminally ill and plugged into life support machines Technology takes over And when we do eventually die it is often the inadequacy of the equipment or the shortcomings of the

treatment that are blamed Instead of accepting death as a natural and inevitable fact of life we are in danger of convincing ourselves that given further medical advances we shall be able to stave it off for as long as we like Some people want to achieve immortality through their works or their descendants said Woody Allen I want to achieve it through not dying Now for the first time science seems to be holding out the slender hope of cheating death Already some of our vital parts can be replaced with natural or synthetic substitutes In time it seems the transplant surgeon will be able to do for a human being what any competent mechanic in a well equipped garage can do for a car Key words Death Reincarnation Consciousness Cosmos Science Soul Afterlife Universe Author Bio David Darling is the author of more than 40 titles including narrative science titles Megacatastrophes We Are Not Alone Gravity's Arc Equations of Eternity a New York Times Notable Book and Deep Time He is also the author of the bestseller The Universal Book of Mathematics From Abracadabra to Zeno's Paradoxes Darling's other titles include The Universal Book of Astronomy and The Complete Book of Spaceflight as well as more than 30 children's books His articles and reviews have appeared in Astronomy Omni Penthouse New Scientist the New York Times and the Guardian among others David Darling was born in Glossop Derbyshire England on July 29 1953 and grew up in the beautiful Peak District close to Kinder Scout for those who know the area He went to New Mills Grammar School and then on to Sheffield University where he earned his B Sc in physics in 1974 and Manchester University for my Ph D in astronomy in 1977 David Darling's interests apart from his work and family include singing song writing and playing guitar

Equations of Eternity David Darling, 2013-06 You are roughly eighteen billion years old and made of matter that has been cycled through the multimillion degree heat of innumerable giant stars You are composed of particles that once were scattered across thousands of light years of interstellar space particles that were blasted out of exploding suns and that for eons drifted through the cold starlit vacuum of the Galaxy You are very much a child of the cosmos In giving birth to us the universe has performed its most astonishing creative act Out of a hot dense melee of subatomic particles which is all that once existed it has fashioned intelligence and consciousness Some of those tiny primordial pinpoints of matter from the infant cosmos have become temporarily arranged to make your brain and mine Your thoughts at this very moment derive from energy transactions between particles born at the dawn of time Somehow the anarchy of genesis has given way to exquisite intricate order so that now there are portions of the universe that can reflect upon themselves and ask Why am I here What is the purpose of life consciousness and reality In posing these questions we are in a sense the universe questioning itself a most extraordinary realization It helps dispel permanently the notion that we are irrelevant and insignificant in nature s broad scheme The fact is we stand at the known apex of cosmic evolution Small though we may be physically we are giants when measured on the scale of complexity And it is that complexity of our brains in particular that is an essential prerequisite to awareness Yet the universe did not set out to be aware During the first few chaotic microseconds when all the matter and energy there would ever be was erupting from the primeval fireball there was no great plan to make conscious minds Nature is congenitally blind Evolution is not and never was a steady march toward a certain type of order or life or consciousness There is no way of knowing in advance what forms nature will take no favorites no movement toward a predetermined goal On the other hand it is hard to believe that we are here by chance Why are we aware Key words Death Reincarnation Consciousness Cosmos Science Soul Mind Universe Author Bio David Darling is the author of more than 40 titles including narrative science titles Megacatastrophes We Are Not Alone Gravity s Arc Equations of Eternity a New York Times Notable
