The Theory of Evolution

Reinforcement and Study Guide

Section 15.1 Natural Selection and the Evidence for Evolution

In your textbook, read about Charles Darwin and natural selection.

For each statement, write **true** or **false**.

- _____ 1. H.M.S. *Beagle*, upon which Charles Darwin served as naturalist, set sail on a collecting and mapping expedition in 1831.
- _____ 2. The environments that Darwin studied exhibited little biological diversity.
- _____ 3. By careful anatomical study, Darwin found that the many species of plants and animals on the Galapagos Islands were unique and bore no relation to species seen in other parts of the world.
- _____ 4. The tortoises of the Galapagos Islands are among the largest on Earth.
- _____ 5. After returning to England, Darwin studied his collections for 10 years.
- _____ 6. Darwin named the process by which evolution proceeds *artificial selection*.

You are a naturalist who traveled to the Galapagos Islands. Below are excerpts from field notes. Next to each set of notes, write a heading. Use these choices: Overproduction of Offspring, Natural Selection, Struggle for Existence, Variation.

7.

Field Notes

Female finches found on the Galapagos Islands lay enormous numbers of eggs.

8.

Field Notes

These finches compete for a particular species of insect that inhabits the small holes found in tree bark.

9.

Field Notes

Some finches' beaks are long, some are short. The finches with long beaks are better adapted to remove the insects from the bark.

10.

Field Notes

The finches with the long beaks survive and produce greater numbers of offspring with long beaks.

Chapter 15 The Theory Of Evolution Glencoe

Theodore Lidz

Chapter 15 The Theory Of Evolution Glencoe:

After Parsons Renee C. Fox, Victor M. Lidz, Harold J. Bershady, 2005-08-25 Esteemed twentieth century sociologist Talcott Parsons sought to develop a comprehensive and coherent scheme for sociology that could be applied to every society and historical epoch and address every aspect of human social organization and culture His theory of social action has exerted enormous influence across a wide range of social science disciplines After Parsons edited by Ren e Fox Victor Lidz and Harold Bershady provides a critical reexamination of Parsons theory in light of historical changes in the world and advances in sociological thought since his death After Parsons is a fresh examination of Parsons theoretical undertaking its significance for social scientific thought and its implications for present day empirical research The book is divided into four parts Social Institutions and Social Processes Societal Community and Modernization Sociology and Culture and the Human Condition The chapters deal with Parsons notions of societal community societal evolution and modernization and modernity After Parsons addresses major themes of enduring relevance including social differentiation and cultural diversity social solidarity universalism and particularism and trust and affect in social life The contributors explore these topics in a wide range of social institutions family and kinship economy polity the law medicine art and religion and within the context of contemporary developments such as globalization the power of the United States as an empireless empire the emergence of forms of fundamentalism the upsurge of racial tribal and ethnic conflicts and the increasing occurrence of deterministic and positivistic thought Rather than simply celebrating Parsons and his accomplishments the contributors to After Parsons rethink and reformulate his ideas to place them on more solid foundations extend their scope and strengthen their empirical insights After Parsons constitutes the work of a distinguished roster of American and European sociologists who find Parsons theory of action a valuable resource for addressing contemporary issues in sociological theory All of the essays in this volume take elements of Parsons theory and critique adapt refine or extend them to gain fresh purchase on problems that confront sociologists today

Politics, Sociology and Social Theory Anthony Giddens, 2013-06-10 Built upon a series of critical encounters with major figures in classical and present day social and political thought this volume offers not only a challenging critique of major traditions of social and political analysis but unique insights into the ideas which Giddens has developed over the past two decades

War in Human Civilization Azar Gat, 2008 Why do people go to war Is it rooted in human nature or is it a late cultural invention And what of war today is it a declining phenomenon or simply changing its shape This book sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history

The Loss of Happiness in Market Democracies Robert Edwards Lane, 2000-01-01 Despite the fact that citizens of advanced market democracies are satisfied with their material progress many are haunted by a spirit of unhappiness There is evidence of a rising tide of clinical depression in most advanced societies and in the United States studies have documented a decline in the number of people who regard themselves as happy Although our political and

economic systems are based on the utilitarian philosophy of happiness the greatest good for the greatest number they seem to have contributed to our dissatisfaction with life This book investigates why this is so Drawing on extensive research in such fields as quality of life economics politics sociology psychology and biology Robert E Lane presents a challenging thesis He shows that the main sources of well being in advanced economies are friendships and a good family life and that once one is beyond the poverty level a larger income contributes almost nothing to happiness In fact as prosperity increases there is a tragic erosion of family solidarity and community integration and individuals become more and more distrustful of each other and their political institutions Lane urges that we alter our priorities so that we increase our levels of companionship even at the risk of reducing our income Essays on the Sociology of Parsons G. C. Hallen,1978 **Science Interactions** ,1996

Metaphor and History Robert A. Nisbet, The primary purpose of *Metaphor and History* is to explain the sources and contexts of the Western idea of social development Nisbet explores the concept of social change across the whole range of Western culture from ancient Greece to the present day He does not see the idea of social development as a nineteenth century phenomenon or a by product of the idea of biological evolution Instead Nisbet finds the metaphor of organic growth and the analogy of the life cycle among the oldest in the history of human thought embedded in the pronouncements of sages historians and social scientists from Heraclitus and Aristotle to Comte Marx Spengler Toynbee Berdyaev and Sorokin He relates the classic Greek metaphor of growth applied to society the Christian epic with its substance in the fusion of Hebrew and Greek ideas and ideas of progress natural history evolution and sociological functionalism This book may be considered the biography of a metaphor of social development one that has persisted through two and a half millennia of Western European history A sociologist s view of history this is a work at once of synthesis and of exploration of the premises and foundations of social evolution and social change Indian Journal of Social Research ,1976 **Sociology and Human Destiny** Gregory Baum,1980 A Crossroad book Includes bibliographical references *The Emergence of Sociological Theory* Jonathan H.
