Explain in your own words how medical words are constructed.

Start with a root, which conveys the central meaning, then add a prefix or suffix or both to give further meaning to the root word. A combining form allows linking of multiple terms together for even greater detail of meaning.

Why is correct spelling so important in medical terminology?

The spelling describes many aspects of the meaning of the word. Incorrect spelling could give a completely different meaning to the term.

What languages are the origins for our English medical terms? Which language describes most of the terms for the body's organs? Which language describes diseases that affect these organs?
