## Adaptations and Mutations

  - Favorable mutations are passed down to future generations through reproduction.

  - Evolution causes descendents to be much different than their ancestors.
  - Eventually, it can cause a new species to arise.
- **Natural selection** is the process in which evolution is able to occur.
  - Traits become more or less common in a population depending on how beneficial they are.

*Natural selection driven on both positive and negative variations, and helps organisms adapt and evolve.*
