

Chapter 14 The Human Genome

Section 14-1 Human Heredity (pages 341-348)

TEKS FOCUS: 6A Information for traits in DNA; 6D Genetic variation; 6F Identify and analyze karyotypes

This section explains what scientists know about human chromosomes, as well as the inheritance of certain human traits and disorders. It also describes how scientists study the inheritance of human traits.

Human Chromosomes (pages 341-342)

- How do biologists make a karyotype? _____

- Circle the letter of each sentence that is true about human chromosomes.
 - ☐ The X and Y chromosomes are known as sex chromosomes because they determine an individual's sex.
 - ☐ Males have two X chromosomes.
 - ☐ Autosomes are all the chromosomes, except the sex chromosomes.
 - ☐ Biologists would write 46,XY to indicate a human female.
- Complete the Punnett square below to show how the sex chromosomes segregate during meiosis.

	Female XX	
	X	X
Male XY	X	
	Y	

- Why is there the chance that half of the zygotes will be 46,XX and half will be 46,XY?

Biology: How Life Works (Volume 1) James Morris, 2013-01-04 Ordinarily textbooks are developed by first writing chapters then making decisions about art and images and finally once the book is complete assembling a test bank and ancillary media This process dramatically limits the integration across resources and reduces art media and assessments to ancillary material rather than essential resources for student learning Biology How Life Works is the first project to develop three pillars the text the visual program and the assessment at the same time All three pillars were developed in parallel to make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration These three pillars are all tied to the same set of core concepts share a common language and use the same visual palette In this way the text visual program and assessments are integral parts of student learning rather than just accessories to the text
